

The Check List for Ordering Parts and Tools

We've developed a simple, easy to follow check list for creating your order and that allows you to keep track of the parts that you have already decided upon and eliminate those forgotten items that can be a real pain when its time to assemble your rifle.

The list contains all of the parts, subassemblies and tools for the AR15 and its variants in simple to follow categories and subcategories. Just go through the list and make your decision, fill in the blanks and your done. Once you order your parts you can use the list to keep inventory of the parts as they arrive.

This check list is a PDF document that you can print out and fill in by hand while looking through our AR15 catalog. Or you can leave it open on your computer screen along with our website and copy and paste your parts over to it. Once you've completed the list you can go ahead and do a "save as" to keep it for ordering or print it out.
