VOLQUARTSEN RUGER® MARK II/III/22-45 VC TARGET FRAME

Precision-Machined Frame With Match Grade Internal Parts Promotes Outstanding Accuracy

Complete frame machined from aluminum alloy weighs only 7 oz. and comes with a whole list of popular accurizing features to help you shoot super-precise groups with your Mark III. Each VC frame comes with all of the following items installed: extended bolt release, precision target trigger, wire-EDM cut target hammer and sear, Titanium disconnect, spring-loaded magazine ejector, and an extended safety button. Each VC Frame ships from the factory with a clean, crisp 2 3/4 lb. trigger pull. The magazine disconnect has also been eliminated from this frame. Has the standard factory grip frame configuration, so it accepts any grips designed for Mark III steel frame. Available with or without a set of Volthane target grips.

SPECS: Machined aluminum, matte black finish. Accepts only Mark III magazines. Installation instructions included. FFL not required for purchase.

- #930-000-131AS Volquartsen Mark III VC Target Frame, 3Z433M3L \$ 449.99
- #930-000-132AS Volquartsen Mark III VC Target Frame w/Target Grip, 3Z459E17 479.99

LONE WOLF TIMBERWOLF POLYMER FRAME FOR GLOCK®

Improved, Shooter-Friendly Design Allows For Customization & Easy Attachment of Lights & Lasers

Durable, polymer bare frame provides a solid foundation for a custom build, or may be used as a replacement for your Gen 3 Glock pistol. Improved designed includes a host of features desired by experienced pistol shooters including a rounded trigger guard, an extended beaver tail to eliminate slide bite and a larger mag catch/release aids in easier magazine exchanges for shooters with any size hands. A higher grip angle and an aggressive checkering pattern improve grip and allow for more instinctive sighting. Two interchangeable back strap inserts provide user with grip customization options - a "flat" version that gives 1911-style feel, or a "swelled" version that replicates an XD or Sig feel. Finally, an integrated 3-slot Picatinny/Weaver-style rail accommodates lights or lasers. Still fits standard model-specific Glock holsters.

SPECS: Reinforced molded polymer, matte black. Fits Gen 2 & 3 Glock 17, 17L, 22, 24, 31, 34, 35 and 37 upper receivers. 13.1 oz (372g) wt. Requires Gen 3 lower parts. Includes all non-standard parts specific to the frame. FFL required for purchase.

- #100-011-176AS Timberwolf Polymer Glock Frame, 5B199D99 \$ 199.99

TACTICAL SOLUTIONS RUGER® MARK I/II/III & 22/45 PAC-LITE BARREL/RECEIVER

Provides Competition-Ready Accuracy & Improved Balance For Better Handling

Lightweight, easy to install, replacement barrel/receiver turns your Ruger Mark III or 22/45 pistol into a well-balanced, competition-ready firearm in seconds. A button-rifled steel liner works with the integrated, adjustable rear sight and ramped front sight to deliver impressive accuracy. Durable, milled stainless steel ejector is built for reliability and long-lasting performance. 1/2" - 28 tpi muzzle threads enable attachment of the Pac-Lite compensator (sold below) and are pre-drilled and tapped for the Pac-Lite scope base (also sold separately). Fluted models are available for extra weight reduction.

SPECS: 6061 T6 aluminum, hardcoat anodized, black or black with silver flutes. 4140 steel-lined barrel; .900" (2.3cm) O.D. 1-16" twist. Available in 4.5" and 6" barrel lengths. Fits Ruger Mark III and 22/45; also fits older model Mark I/II. 22/45 installation may require minor fitting. FFL required for purchase.

- #100-011-119AS 4.5" Pac-Lite Barrel/Receiver, Black, 8F287G57 \$ 290.00

PAC-LITE COMPENSATOR - 360-degree venting holes and a large internal expansion chamber disperse gasses evenly to help tame recoil and muzzle rise, so that you can stay on target and make quicker follow-up shots. Sleek-looking compensator has same O.D. as Pac-Lite barrel; quickly screws onto 1/2" - 28 tpi threads.

SPECS: 6061-T6 aluminum, hardcoat anodized, matte black (MB) or silver (SIL). 2" (5.1cm) O.A.L.. .900" (2.3cm) O.D. 1/2"-28 tpi threads.

- #100-011-117AS Pac-Lite Compensator, MB, 8K33J02 \$ 34.99
- #100-011-118AS Pac-Lite Compensator, SIL, 8K33G02 34.99

PAC-LITE STANDARD SCOPE BASE - Machined aluminum base attaches to a pre-drilled and tapped Pac-Lite barrel to allow the mounting of optics or other accessories. Compatible with Picatinny or Weaver-style scope rings.

SPECS: 6061-T6 aluminum, hardcoat anodized, matte black. 3.4" (8.6cm) O.A.L. Fits Pac-Lite barrel/receiver.

- #100-011-118AS Pac-Lite Standard Scope Base, 8K30M00 \$ 30.00

VOLQUARTSEN RUGER® MARK II/III COMPETITION BOLT ASSEMBLY

Enhances Reliability & Performance For Competition

Machined steel bolt drops into Ruger .22 pistol and helps eliminate stovepipes, failures to fire, and improves overall function. Offers superior tolerances, fit and finish. Bolt features the tool steel Exact Edge Extractor built to withstand years of use and the SureStrike firing pin that helps eliminate light hits. Integral Extended Bolt Racker makes it easy to charge the pistol and avoid pinched fingers.

SPECS: Machined steel. Matte black finish except for stainless portion visible through ejection port. Includes recoil spring assembly.

- #930-000-134AS Ruger Mark II Competition Bolt, 3Z229N58 \$ 239.99
- #930-000-133AS Ruger Mark III Competition Bolt, 3Z229G58 239.99

VOLQUARTSEN RUGER® MARK II/III & 22/45 LLV COMPETITION PISTOL UPPER

Lightweight, Machined Billet Receiver With Stainless Steel Barrel

Weighing just under 16 oz., this complete barreled receiver is precision machined from a single piece of aluminum alloy. An integral Picatinny rail is machined into the top of the receiver for optic and accessory mounting options. Upper receiver features a contoured, stainless steel barrel that has been machine-honed and lapped. Stainless steel breech face will withstand years of use. Receiver comes with 1/2" x 28 muzzle threads and screw on thread protector.

SPECS: Aluminum, Type III hardcoat anodized finish, matte black. Fits Ruger MK II, MK III and 22/45. 6" - 15 oz. (425g) wt. 4.5" - 14 oz. (396g) wt.

- #930-000-140AS 6" LLV Competition Upper Receiver, 3F414M99 \$ 439.99
- #930-000-141AS 4" LLV Competition Upper Receiver, 3F414N99 470.00

CZ USA CZ 75 KADET II RIMFIRE CONVERSION UNIT

Turns Your CZ Into A Training Or Plinking Pistol

Complete slide assembly enables the firing of .22 LR cartridges in your centerfire CZ 75. The Kadet is the same size as the centerfire slide, but only the lower third moves,

reducing the overall mass but still retaining the ability to cock the hammer. Slide stop will hold open and release the slide the same as on original pistol. Conversion kit is constructed of forged steel and comes with an adjustable rear sight, plus two 10-round .22 LR magazines. Minor fitting may be necessary for correct slide-to-frame fit on your specific pistol. Fits full-size CZ 75, plus these compact/sub-compact models: 75 Compact, P-01, P-06, PCR, and RAMI. Magazines will extend beyond the bottom of grip frame on these models. Kadet will not work on the 97, 75 TS, P-07, or P-09 models.

SPECS: Steel, blued. 8.11" (20.6cm) O.A.L. 4.72" (12cm) barrel length. 11 lbs. (499g) wt.

- #100-015-794AS CZ 75 Kadet II Rimfire Unit, 7H430D99 \$ 430.99

GUNCRAFTER INDUSTRIES 50 GI® CONVERSION SYSTEM for GLOCK®

Steps Up Large-Frame Glock Pistol To Powerful .50 Caliber Cartridge

Drop-in conversion system replaces the top end of your Glock 20/21 pistol and converts it to fire the hard-hitting, yet controllable, 50 GI cartridge. Developed by Guncrafter, the 50 GI's head is the same diameter as a .45 ACP, so the rest of your pistol remains stock, allowing easy conversion back to the original caliber. 50 GI ammo can be loaded to drive a 185 grain bullet at 1,200fps, with a felt recoil similar to 230 grain .45 ACP ball ammo. Delivers greater knock-down power, while remaining controllable during rapid fire. Conversion unit comes fully assembled with 4 1/2" stainless steel barrel, firing pin, and guide rod with captive recoil spring. Slide and barrel are precision machined from stainless steel forgings to the same exacting tolerances as the original factory components. Non-reflective, matte finish is durable and good-looking. Black polymer fixed sights with easy to acquire white dot on front sight and U-shaped white outline around rear sight notch. The SF-style magazine uses a modified .45 ACP follower and has an extended base pad that allows it to hold 9 rounds; convenient witness holes at the rear. Fits standard mag pouches for .45 caliber Glock mags. Cut for SF-style magazine catch. Additional magazines available separately.

SPECS: Slide/Barrel Assembly - Stainless steel, matte finish. Magazine - Stainless steel liner, black polymer shell, base pad, and follower. 9-round capacity. May require some fitting of conversion unit's locking lug and/or pistol's locking block. Fits Glock 20/21 pistols only.

JENTRA STAINLESS STEEL PIN KIT for GLOCK®

Pins Give Long Service Life & Enhance Appearance

Stainless steel pins fit into Glock pistols to give long service life and high resistance to corrosion and wear. Pins also add striking contrast color against the frame to enhance appearance. **JBP-1** kit fits into Gen 1, 2, and 3 Glocks and includes trigger pin, locking block pin and trigger housing pin. **JBP-2** fits Gen 4 Glocks, and includes trigger pin, locking block pin, short trigger housing pin for use without a backstrap, and long trigger housing pin for use with a backstrap. 

- #463-000-010AS JBP-1 SS Pin Kit, 3F14N56 \$ 16.95
- #463-000-011AS JBP-2 SS Pin Kit, 3F17A80 19.95

TACTICAL SOLUTIONS TSG-22² CONVERSION KIT for GLOCK®

Shoot More, Pay Less
With .22 LR Ammo For
Practice

The TSG-22² .22 LR conversion system is built to the same high quality standards as your original Glock pistol to provide a lower-cost alternative to burning up expensive centerfire ammo during practice. TSG-22² It has the same external dimensions as the factory slide and barrel, so the gun feels and moves the same – just with less recoil. Easy-to-install: remove the factory slide, replace with the TSG-22 slide/barrel assembly, and insert the included 10-round rimfire magazine. Includes Glock sights with factory front white dot and rear white outline U-notch. Polymer magazine locks slide open after last round fired. Precision machined steel slide is treated with a friction-reducing black nitride finish for superb wear and corrosion resistance. Comes with one 10-rd or 15-rd magazine (choose below). Spare magazines sold separately. 

SPECS: Slide – 4140 carbon steel, black nitride finish. Barrel – 4130 carbon steel, matte blued. Magazine – Polymer, black. 10-rd capacity. For best results, use .22 LR ammunition with 40 grain round nose bullets. **TSG-22² 17/22** fits all generations of Glock® 17, 22, 34, 35, and 37, including Gen4 models. **TSG-22² 19/23** fits all generations of Glock® 19, 23, 32, and 38, including Gen4.

GHOST GRIP PLUG KIT FOR GEN4 GLOCK®

Helps Keep Out Dirt & Enhances Magazine Insertion & Removal

Polymer insert fits into gap at bottom of Glock grip to help keep out dirt and gives a beveled edge to help ease magazine removal and insertion. Includes two plugs - one for use with back strap, one for

GRIP FORCE GRIP ADAPTER for GLOCK®

Helps Improve Hold & Sight Acquisition For Fast Follow Up Shots

Easy to install adapter helps improve grip and shooting control. Modifies the backstrap angle to create a subtle change in grip and wrist positioning that helps enhance pointability for improved sight acquisition and faster follow up shots. Extended tang increases leverage for better control during rapid fire and helps the user form the proper shooting grip, especially when drawing from a holster. Also prevents the slide from making contact with the skin between thumb and forefinger. Comes with a Gen 123SC adapter that features a smooth tang and a shorter backstrap. Easy to install with the included trigger housing pin. No permanent modifications to the gun; won't damage the pistol or mar the frame. 

SPECS: Textured plastic, black. Gen 123SC adapter fits Gen 4 pistols in the short frame configuration or with the Medium grip panel installed. **Gen 123** adapter fits Glock Gen 1, 2, 3 pistols and the Gen 4 pistol with the Medium grip panel installed. May not fit pistols with letter L serial number prefix (i.e., LXX123). Increases trigger reach by .077" (1.96mm) and tang area thickness by .084" (2.13mm). **Gen 4** adapter fits Glock Gen 4 pistols in the "SF" (short frame) configuration to give the pistol a more upright backstrap/grip angles, will not fit over the Medium or Large grip panels. Increases trigger reach by .091" (2.31mm) and tang area thickness by .085" (2.16mm).

NEW! PEARCE GRIP GRIP FRAME INSERT for GLOCK®

Fills The Opening In Glock Frames For Smoother Reloading

Plastic plug installs in the bottom rear cavity of the frame to fill the opening found in Glock pistols. Front "lip" forms a tight, flush bond with the mag well to help make sure the mag goes where it should, smoothly. Keeps dirt and debris from finding its way inside the pistol and gives a clean, smooth look. Uses the lanyard hole for retention to snap firmly into place. Does not add extra rounds.

NEW! APEX TACTICAL SMITH & WESSON M&P STAINLESS STEEL BARRELS

Improves Accuracy & Optimizes Performance

Swap your M&P's factory barrel for one of these and enjoy an immediate jump in accuracy and performance. The folks at Apex Tactical have engineered a barrel capable of shooting groups as small as a 1 1/2" at 25 yards. These 9mm barrels have a 1-10" twist and are available in either 4.25" or 5" lengths. **Semi Drop-In** replaces factory barrel and may require some minor fitting before installation. **Gunsmith Fit** requires fitting by a professional gunsmith. 

LONE WOLF FLASH SUPPRESSORS & COMPENSATORS

Dynamic Recoil & Flash Control Options

Easy-to-install, specialized muzzle accessories give Glock shooters a choice of flash suppression or recoil control. **Compensator's** side ports direct gasses 30 degrees rearward and out of the top ports, resulting in reduced felt recoil and muzzle jump. As a result, the shooter can remain centered on the target, allowing for quicker, more reliable follow-up shots. Integrated Allen screw indexes compensator for correct positioning. **Flash Suppressor** has longitudinal 6-port design that reduces muzzle flash, affording the shooter concealment and vision preservation in night-adapted environments. 

SPECS: CNC-machined steel. **Flash Suppressor** - Black oxide finish. 1.6" (4cm) OAL. .750" (1.9cm) O.D. 1.1 oz (31.2g) wt. Fits pistols chambered in 9mm. 1/2" x 28 threads. **Compensator** - Parkerized, matte gray. 1.2" (34cm) OAL. 1" (2.5cm) wide. 3/4" (1.9cm) high. 1.6 oz (45.4g). Available in 9mm with 1/2" x 28 threads and .40 S&W with 1/8" x 24 threads. Allen wrench and instructions included.

ADVANCED ARMAMENT THREADED PISTOL BARRELS

Barrels Feature Suppressor-Ready Threads

Stainless steel barrels drop into popular models of 9mm and .45 ACP semi-auto pistols and come with either metric or English unit threads that mate with different types of suppressors. Barrels are designed to install with no fitting required, and have rifling compatible with both jacketed and lead ammunition. All barrels come with knurled thread protectors for use when not using a suppressor.

LSP HIGH STANDARD MATCH BARREL

Replace Worn Or Shot-Out Barrels With Accurate, Match-Quality Models

Precision-machined from Douglas Premium blanks and cut with a special match chamber. Two models: **Match Bull Barrel** is full-contour for greater forward weight, adds the "muzzle-heavy" feel. **Match Alumina-Lite Barrel** features a turned down forward section that's sleeved with aluminum to help compensate for the weight of red-dot optics or a scope. Both feature a recessed target crown and are pre-drilled to accept the **LSP Scope Mount** listed elsewhere. Fits push-button, take-down models of High Standard. **SPECS:** Steel, polished blue or matte silver finish. Chambered .22 long rifle. 5 1/2" (14cm) long. .90" (22.8mm) diameter. **Bull:** 14.6 oz. (414 g). **Alumina-Lite:** 9.7 oz. (274 g) wt.

STORM LAKE PRE-FIT PORTED BARREL for GLOCK®

Reduces Muzzle Flip & Recoil For Fast Follow-Up Shots

Tame recoil and increase your shooting speed by venting exhaust gases through a series of four ports in the top of the barrel. Broach-cut rifling gives improved accuracy with lead or jacketed bullets. Chambered for .40 S&W. **SPECS:** 416 stainless steel, polished finish. .40 S&W caliber. 5.32" (13.5cm) long. Rc 40 - 42. Fits Glock 35.
#842-000-012AS Ported Barrel for Glock, 2D169P78 . \$ 180.99

HIGH STANDARD FACTORY PISTOL BARRELS

Factory Made For Best Fit & Accuracy

Restore or customize your High Standard pushbutton, take-down pistol with a factory replacement barrel. All barrels are drilled and tapped for High Standard Universal Scope Mount (#430-000-122). Models with front sight cut or tap, as well as cuts for muzzle stabilizer, are noted in chart. Sight not included. **SPECS:** Steel, blued, gloss or matte finish. Available in .22 LR and .17 High Standard (.17 PMC/.17 Aguila) calibers and three contours: Round (R), Fluted (F), and Slab-Sided (S).

STORM LAKE SPRINGFIELD XD/XDM MATCH GRADE BARREL

Broach Cut Rifling Improves Accuracy With All Bullet Types

Custom-grade barrels make it easy to improve accuracy from new pistols or restore it to those guns that are simply "shot out." Precision machined from certified 416 stainless steel hardened to Rc 40-42 to deliver superior accuracy and strength. Broach-cut rifling provides excellent accuracy with both copper jacketed and lead bullets. Fully chambered and throated to match grade standards, with an extended ramp for full case support. Semi-drop-in design may require some gunsmith fitting. **SPECS:** 416 stainless steel, natural, polished finish. Lengths and calibers as indicated below.

STOCK #	FITS	LENGTH	PRICE

#842-000-036AS	.45 ACP XD Tactical	5"	2D142K05 \$ 151.99

BARREL FITTING

All custom aftermarket barrels will need some fitting. The amount required will depend on the tolerances allowed by both the barrel and slide makers, as well as the frame of the pistol. Some barrels may need the chamber cut to full depth after the barrel has been fitted. We carry a wide variety of files and stones to help with the fitting, and chambering reamers from Clymer and Manson Precision.

LONE WOLF PRE-FIT BARRELS for GLOCK®

Tight Lockup For Excellent Accuracy Potential; Conventional Rifling Accepts Cast Lead Bullets

Match-grade 416 stainless barrels are manufactured for a tighter fit than the factory for improved lockup and greater potential accuracy. Conventional, broach-cut rifling allows you to shoot cast or jacketed bullets in these barrels without the lead fouling problem associated with the originals. All barrels have an improved feed ramp design and provide maximum support to help prevent case failures. Both the feed ramp and chamber have been polished for reliable feeding and extraction. May require minor fitting. **SPECS:** 416 stainless steel, matte finish.

LONE WOLF THREADED BARREL for GLOCK®

Threaded For Compensator, With Conventional Rifling & Fully Supported Chamber

Match-grade barrel has a threaded muzzle to enable mounting of a compensator or suppressor. Machined from a 416 stainless forging to tighter-than-factory tolerances for drop-in fit and improved lockup, with conventional land-and-groove rifling for excellent potential accuracy with both lead and jacketed ammunition. The improved feed ramp design ensures proper feeding with a wide variety of bullet types and provides maximum chamber support. Thread protectors sold separately. **SPECS:** 416 stainless steel, non-reflective black oxide or natural silver finish. Fits all generations of the Glock models listed below, including Gen 4. Muzzle thread patterns: **Model 17/19** - 1/2"-28 tpi; **Model 21** - .578"-28 tpi; **Model 22** - 9/16"-24 tpi. **Thread Protectors** - 303 stainless steel, knurled, black oxide finish.

NEW! LONE WOLF DROP-IN 9MM CONVERSION BARRELS for GLOCK®

Converts Your .40 or .357 Glock To Shoot 9mm Ammo

Drop-in replacement barrel converts your G22 or G23 to shoot less expensive, softer-recoiling 9mm ammo. Pre-fitted to the slide and machined to tighter dimensions than the factory barrel for more consistent lockup and better accuracy potential. Improved feed ramp design gives maximum chamber support. Conventional-style rifling works well with jacketed and cast lead bullets. Requires 9mm Glock magazines to complete the conversion (available separately) for reliable feeding of rounds. **SPECS:** 416 stainless steel, broached, conventional rifling. Drop-in fit; minor fitting may be required on some guns. **Glock 22** barrel fits models 22 and 31. **Glock 23** barrel fits models 23, 27, 32, and 33. Requires use of 9mm magazine for proper feeding.

STORM LAKE GLOCK CONVERSION BARRELS

Ready To Drop-In, Add A Magazine In The New Caliber & Go Shooting

Drop-in barrels let you convert your Glock to a different caliber simply by changing the barrel and adding a magazine in the new caliber (available separately). Machined from stainless steel for superior strength, accuracy, and performance. Tight tolerances (+/- 0.001" to 0.002") in all critical areas. Cut broach rifling with 1-16" twist enables shooting of jacketed and lead bullets. Models available for Glock 22, 27, and 30. Magazines indicated in the table below will provide the correct fit with the bottom of the grip frame. **SPECS:** 416R stainless steel, hardened to Rc 40-42, natural finish. 1-16" twist rifling. May require minor fitting.

**COMINOLI MANUAL
SAFETY KIT for GLOCK®**

Helps Prevent Unintentional Discharges

Manually engaged safety lever provides an extra level of security and safety for Glock owners. Blocks trigger movement, allows the slide to be cycled and pistol loaded or unloaded with the safety on. Operates easily with your right-hand thumb. Contact pad is easy to engage, yet won't interfere with holster fit. All Glock passive safeties continue to function normally. Gunsmith installation is recommended. **USA**

SPECS: Thumb Safety - Plastic trigger housing, black. Steel parts, black thumb pad. Pad - 1/2" (12.7mm) long, 1/4" (6.35mm) wide. Includes instructions with positioning template, replacement trigger housing, plus thumb lever, detent pressure plate, spring and trigger bar guide. Fits all models except Model 36.

#213-000-001AS Thumb Safety for Glock, 3A77L30 . . . **\$ 85.00**

SAFETY INSTALLATION JIG - Holds your Glock frame securely and has two, machined slots that correspond with the cut you'll have to make to install Cominoli's Manual Thumb Safety. Slot marked "SM" is for 9mm, .40 S&W, and .357 SIG; slot marked "LG" is for .45 ACP and 10mm. Includes a 3/32" end mill that must be used in a high-speed rotary tool (listed elsewhere) to properly make the cut. Delrin® guide makes it easy to cut the correct angle. **USA**

SPECS: Safety Installation Jig - Aluminum, silver matte finish. 3 1/2" (9cm) long, 5" (12.7cm) high, 1/4" (9.5mm) thick. Includes frame locating pins and delrin guide. 3/32" End Mill - High speed steel. 3/32" (2.4mm) diameter, 1/4" (4.8mm) shank. Single end, centercut.

**SAF-T-BLOK
SAF-T-BLOK for GLOCK®**

Prevents Unintentional Discharges; Discourages Unauthorized Use

Drop-in, trigger-block safety fits behind the trigger to frustrate and delay unauthorized personnel that might try to fire the weapon. Snaps easily into place; ejects instantly for use. **USA**

SPECS: Molded polymer, black. For right-handed shooters only. Fits all Glocks manufactured after January 1998.

#100-000-841AS Right-Handed Saf-T-Blok, 8K11L44 . . . **\$ 14.95**

**CYLINDER & SLIDE BROWNING HI-POWER
EXTENDED/AMBIDEXTROUS SAFETY**

Wide, Can't-Miss Thumb Pad For Faster Release, Faster Shooting

Easy-to-install, extended safety lever effectively doubles the thumb contact area and makes it easier to hit in all shooting situations. Both ambidextrous and single side extended styles. Serrated, extra wide thumb contact areas with rounded edges to help prevent snagging on holsters or clothing. Gunsmith fitting required.

SPECS: Steel matte blue or hard-chrome silver finish. Contact area: Single - 726" (18mm) x .17" (4.3mm), Ambidextrous - 1" (2.5cm) x .21" (5.4mm). Includes detent spring, plunger and instructions.

**CYLINDER & SLIDE BERETTA 92/96
STAINLESS STEEL GUIDE ROD**

Drop-In Replacement For Factory Plastic Part

No gunsmithing required to gain improved function and reliability with your Beretta Model 92 or 96. One-piece, stainless steel guide rod replaces the two-piece plastic Beretta factory guide rod; works with your factory recoil spring.

SPECS: Stainless steel, matte finish, silver. 3.5" long (9.1 cm) long, .28" (7.2mm) diameter. Fits Beretta models 92 and 96 only

#206-000-021AS S/S Beretta Guide Rod, 6K23J65..... \$ 26.99

**BUFFER TECHNOLOGIES SEMI-AUTO
RECOIL BUFFER™**

Softens Felt Recoil, Stops Frame Battering

Polyurethane spacer fits on the recoil spring guide to cushion slide impact against the frame. Gently slows the slide; helps prevent the constant frame battering that causes premature wear or cracking. Extends the service life of competition and carry pistols. Softens felt recoil, reduces muzzle rise for faster follow-up shots. Change every 1,000 rounds for best results.

SPECS: Polyurethane, gray. 1 per pack. Glock® will not fit Gen4 pistols. 1911 Auto, polyurethane, yellow. 8 per pack. S&W Model 41 fits, 22 rimfire Model 41 and 46. CZ fits 75 and all clones.

**LONE WOLF
GUIDE ROD ASSEMBLY for GLOCK®**

Stainless Steel Prevents Rod Flex & Spring Bind For More Reliable Cycling

Hardened stainless steel guide rod won't break or flex and bind the spring like the factory plastic rod. Helps prevent cycling problems, improves reliability and overall performance. Features a captured, ISMI chrome silicon flat spring that's heat-treated, shot peened, and calibrated to the factory-spec 17 lb. weight. Steel Allen head screw and washer secure the spring to the rod, yet enable easy disassembly for spring replacement.

SPECS: 416 stainless steel guide rod, natural finish; chrome silicon spring. Standard (Std.) fits G17/17L/22/24/31/34/35/37. Does not fit Gen 4 guns. Large fits G20/21/21SF. Compact fits G19/22/33/38.

SPRINCO SEMI-AUTO RECOIL MANAGEMENT SYSTEM

Reduces Felt Recoil,
Muzzle Climb & Frame
Damage

Drop-in system provides significant reduction in felt recoil and grip fatigue by gradually slowing the slide to prevent frame battering. Plus, it keeps the gun "flat" so your sights stay on target. Stainless steel guide rod fitted with a chrome silicon, secondary spring that reduces slide-to-frame impact with no loss of reliable cycling. 1911 models can be tuned by changing recoil springs. Models marked with a * include a new recoil spring, others use your factory or aftermarket spring. Drop-in installation requires no modifications to your pistol. **US**

ZEV TECHNOLOGIES CUSTOM SKELETONIZED STRIKER for GLOCK®

Lightweight For Fast
Locktime; Mirror-Polished
For Smoothness & Speed

Drop-in replacement for factory striker has 15-20% less mass and a highly polished surface for fast lock time and a light, smooth- feeling trigger pull, plus ultra-fast reset for minimum delay between follow-up shots. Precision machined from solid stainless steel with skeletonized cuts like those used on bulkheads in aircraft to reduce weight without sacrificing strength. Hard, polished surface resists galling, wear, and corrosion for years of reliable service. For best results, use with reduced-power striker spring from GlockWorx Competition Spring Kit, available separately. **US**
SPECS: Stainless steel, natural polished finish. Fits Glock pistols cham- bered in 9mm, .357 Sig, and .40 S&W.

#100-004-117AS Custom Skeletonized Striker,
8B72M04..... \$ 79.99

VOLQUARTSEN RUGER® MARK II HAMMER BUSHING

Close Tolerances For A Smooth, Consistent
Trigger Pull

CNC machined from hardened steel to exceptionally close tol- erances to help ensure a smooth, consistent trigger pull. Advanced screw machine technology is used to drill and ream the pivot pin hole perfectly concentric for optimal hammer-to-sear engage- ment. Black oxide finish for added durability and resistance against corrosion. **US**

SPECS: Steel, black oxide finish. Fits Ruger Mark II pistols only.
#930-000-056AS Mark II Hammer Bushing, 3Z6D37..... \$ 7.99

ZEV TECHNOLOGIES V4 CONNECTOR for GLOCK®

Smooth, 3 lb. Pull & Crisp Reset

Gives a clean, lighter-than-factory pull for positive control and "single-action"-like accuracy, while maintaining reliable trigger reset. Precision laser cut from a proprietary steel alloy then heat treated for improved spring tension. Extra-long "slot" prevents debris build-up and keeps trigger parts clean for

smooth, consistent pulls. Produces a trigger pull as low as 3 lbs. in most pistols when used with the Glockworx Competition Spring Kit (available separately).

SPECS: Stainless steel alloy, polished. Fits all Glock models.

#100-012-422AS V4 Connector, 8B13Q14. \$ 14.99

LIGHTNING STRIKE LIGHTWEIGHT STRIKER for GLOCK®

Cuts Lock Time By 50% In Locks

Lightweight **Titanium Striker** reduces lock time by a minimum of 50% for a faster shot and improved accuracy. Drops in with no gunsmithing and no permanent alterations to the firearm required. CNC machined from titanium and hardened for long lasting performance. Lightweight **Steel Striker** is 32% lighter than factory part, heat treated for exceptional strength and performance with hot loads. Coated with Kolene Nutride for greater lubricity and corrosion resistance. Titanium striker includes Wolff striker spring.

SPECS: Solid titanium, TiN coated gold or EDT150 tool steel, heat treated to Rc 70. **Small Frame** fits Glock 9mm/.40 S&W. **Large Frame** fits Glock 10mm/.45 ACP.

FIRING PIN ASSEMBLY KIT for GLOCK®

Quickly & Easily Replace Firing Pin Components

Convenient kit of genuine factory parts helps you easily replace a firing pin assembly that's damaged or has just "given up the ghost". Each kit contains a firing pin, spacer sleeve, firing pin spring, and firing pin safety with spring. A firing pin spring cup is included in kits for models that need it. Kits available for Glock® pistols chambered in 9mm, .40 S&W/.357 SIG/.45 GAP, .45 ACP/10mm, and .380 ACP.

SPRINGER PRECISION SPRINGFIELD XD REDUCED TRAVEL SEAR

Drop-In Sear Shortens Trigger Take-Up, Improves Pull

Drop-in sear reduces trigger travel for a more consistent trigger pull and improved accuracy. Cuts pre-travel about 1/4" to help increase control and help prevent accuracy degrading creep. Lessens total travel to limit finger movement for better follow through. Fits all calibers and models. Comes with pre-polished sear face to speed up installation. Gunsmith installation recommended.

SPECS: Steel, in-the-white. Fits all calibers and models.

#100-003-112AS Reduced Travel Sear, 1B51B18. \$ 59.99

POWER CUSTOM RUGER® MARK I/II/III™ & 22/45™ TOOL STEEL FIRING PIN

For Positive Ignition & Reduced Risk Of Misfire

Replacement firing pin has a larger surface area on the impact point than the factory pin to help ensure positive ignition. Reduces chance of a misfire with ammo made of slightly harder than normal brass. High surface hardness resists wear, too, so you can fire thousands of rounds from your Ruger .22 pistol.

SPECS: A2 tool steel, in the white. Fits Ruger Mark I/II/III and 22/45™ pistols.

#713-000-142AS Ruger .22 Pistol Firing Pin, 3A23J79. . . \$ 24.99

TITANIUM, CARBON STEEL, STAINLESS STEEL, OR WHAT?

Throughout the catalog you'll see similar parts - hammers and sears for example - made out of all three materials. So what's the difference, which is better?

We'll start with the simplest choice, **Carbon** or **Stainless** steel. It's really just a matter of looks, the two metals are so close in wear characteristics, and how smooth a finish you can achieve on the hooks and notches, that it comes down to what you like. If you want a blue hammer on a blue gun, pick a carbon steel part. If you want something to contrast with the bluing, a stainless steel hammer can be finished to a soft matte, almost gray, or polished bright to look much like chrome. Same goes for a stainless gun, match it, or create contrasts with a bright or matte blued hammer. Whatever you choose you'll have excellent wear life out of either a carbon steel or stainless steel part.

Titanium can help deliver the ultimate action speed, and the lightest possible trigger pulls. An identical part made from titanium will weigh about 62% as much as its steel counterpart. If the hammer, strut, mainspring cap and firing pin are 38% lighter, there's less resistance to overcome as you squeeze the trigger, hence, a lighter pull. Since the mainspring can accelerate those parts more quickly, you'll also get a faster lock time. Less time for the sights to slip off target! The drawback - you knew there was one - is that titanium wears much more quickly than steel and can gall pretty easily, which will slow everything back down. The all-important hooks on a titanium hammer will lose their sharp edges much more quickly than those on a steel hammer. That means you (or your gunsmith) will have to re-stone that hammer more often and it will eventually wear out, sooner. If you clean and lube regularly to prevent galling and accept the fact that total life of these parts will be less than steel, the light weight can help your race gun go really fast.

TiN, or Titanium Nitride, isn't a metal, it's an extremely thin, very hard, smooth coating that greatly increases the wear characteristics of the metal to which it is added. A good addition for maximum service life, and that gold color's a great way to set a gun's looks apart from the crowd.

This is a quick look; if you have specific questions on your application, call one of our Tech Support staff, 800-741-0015.

VOLQUARTSEN RUGER® MARK II/III TARGET SEAR

Replacement For Factory Sear Produces A Light, Clean-Breaking Trigger Pull

Drop-in sear provides a crisp, clean, responsive trigger pull for Ruger semi-auto .22 LR pistols. Engagement surface is precision-ground and polished - no stoning required. Made from tool steel and then hardened. Includes sear spring.

SPECS: A2 tool steel, in-the-white, hardened to Rc 58-60. Includes sear spring. Fits Ruger Mark II, III, and .22/45 pistols.

#930-000-050AS Mark II/III Target Sear, 3Z25B52. \$ 27.99

MAJESTIC ARMS RUGER® MARK I/II/III SPEED STRIP KIT

Replaces Factory Parts For Fast Field Stripping & Cleaning

Makes field stripping your Ruger .22 pistol faster and easier by enabling rapid disassembly with a single Allen wrench for routine cleaning and maintenance. Replaces the factory hammer and sticky bolt stop pin that make bolt removal a real chore. Replacement parts are precision machined from high-grade stainless steel to tolerances that meet or exceed the factory parts. Requires no permanent modification to your pistol; gunsmith installation recommended. **Speed Strip 3.2** fits any generation Mark series pistol and features hammer pivot bushing that helps reduce trigger pre-travel significantly and allows safe omission of magazine disconnect in Mark III pistols.

SPECS: Stainless steel, natural silver finish. Kit includes replacement hammer and bolt stop pin, plus Allen wrench and illustrated installation instructions. **Mark I/II** fits Ruger Mark I, II, and 22/45 pistols. **Mark III** fits Ruger Mark III pistol only. **3.2 Kit** includes hammer pivot bushing and fits all Ruger Mark I, II, III, and 22/45 pistols.

PREZINE GRIP ADAPTER & MAG WELL for GLOCK®

Increases Mag Well Opening For Smoother Insertion; Helps Support your Shooting Hand

Drop-in, plastic grip adapter and mag well helps funnel magazine into the grip for faster reloads. Adds a flare at the bottom of the grip that increases stability. Extended mag well also protects magazine if weapon is dropped, helping to minimize jams. Requires no modification to the gun. Fits Glock models 17, 22, 24, 31, 34, and 35.

SPECS: High impact plastic, black. Fits Glock models 17, 22, 24, 31, 34, & 35.

#727-000-001AS Grip Adapter & Mag Well, 7B21A15. . . \$ 29.99

CALIF. COMP WORKS LIGHTWEIGHT MAG WELL for GLOCK®

Lightweight Delrin Matches Grip Frame Perfectly

Enlarges the mag well opening for faster mag changes; funnels the magazine right into the chute. Machined from lightweight Delrin that perfectly matches the Glock grip frame. Thin profile doesn't add much bulk or weight; great on carry pistols. Securely held in place with a single screw; requires drilling only one hole in the rear of the grip frame for installation.

SPECS: Delrin, black. 2 1/8" (6.6cm) long, 1 1/8" (2.5cm) wide. .6 oz. (18 g) wt. Small fits Mod. 17, 17L, 19, 22, 23, 24. Large fits 20, 21.

ALG DEFENSE GLOCK® FLARED MAGWELL

Funnels Mag Into Well For Super-Fast Reloads

Aluminum sleeve widens the magwell opening for smooth, rapid reloads under pressure. Also prevents your palm from getting pinched between the magazine floorplate and pistol grip. Flare acts as a ledge to spread recoil impulse into the bottom of your gripping hand, while a brass mounting insert adds weight to dampen kickback and keep you on target. Extended length allows for more consistent finger placement, control, and accuracy. Installation is quick and easy – no modification to gun required. Simply push brass plug into grip's rear cavity and secure with a set screw through the frame's lanyard hole. Then slip the magwell over the grip base and screw to the plug. 

SPECS: Magwell - Aluminum, hardcoat anodized. 2.8" (7.1cm) long, 1.65" (4.2cm) wide. 1.1 oz. (31.2g) wt. Insert - Brass, natural finish. 2.2 oz. (62.4g) wt. Fits Gen 3 Glock 17 and 22. Not compatible with Gen 4. Will lightly scratch or scuff plastic pistol frame at contact point. Installation instructions and mounting hardware included.

ZEV TECHNOLOGIES SPEED FEED MAGWELL for GLOCK® GEN4

Aids In Smooth, Fast Reloads

Oversized aluminum magazine well extension is engineered for precise geometry,

fit, and angle to ensure quick, positive reloads. Designed primarily for competition use with magazines that have extended base pads. Easy, no gunsmithing installation: the brass mounting insert fits into the void behind magazine well and is secured by a set-screw through the lanyard hole. The extension's powder-coated crinkle finish blends nicely with the pistol frame's textured polymer. Available with small and large brass inserts for 3 oz. and 4 oz. total weights. Heavier model provides extra leverage at a critical point in the firing cycle to help reduce felt recoil and counteract muzzle flip. Both models fit all Gen4 pistols. 

SPECS: Magwell - Aluminum, powder-coated, crinkle-finish, black. 3" (7.6cm) long, 1 1/4" wide, extends approximately 1/8" (9.5mm) below grip. Insert - Brass, natural finish.

T.H.E. ACCESSORIES COMPETITION MAGWELL for GLOCK®

Speeds Reloads, Helps Control Recoil

Oversized magwell guides the magazine into the gun quickly and smoothly to eliminate fumbling during reloads. Helps you make mag changes without taking your eyes off the target, and aids in maintaining a consistent hand position on the grip. Installs in minutes by inserting the brass channel insert in the bottom of the grip behind the magazine well and locking it with the machine screw (hex wrench included). Requires no permanent modification to pistol; remove and return to factory configuration at any time. Brass insert adds weight to aid in recoil control for faster follow-up shots. 

SPECS: Aluminum, anodized, gloss black finish; brass grip plug, 2.8" (7.1cm) long, 1.7" (4.3cm) wide. 3.1 oz. (89kg) wt. Fits Glock 17, 22, 24, 31, 34, and 35 pistols. Minor fitting may be required.

EXTENDED SLIDE LOCK LEVER for GLOCK®

Easier Slide Removal For Quicker Field Stripping

If you've ever tried to field strip your Glock with even slightly oily or sweaty fingers, you'll appreciate the benefit of this extended slide lock lever. Drop-in replacement is 3mm longer than the factory original part to provide a firmer grasp, so you can remove the slide quickly without fumbling with the lever. No gunsmithing required; easy to install, no permanent alterations to the gun. Gun will still fit all standard holsters.

SPECS: Steel, black oxide finish. 1 1/2" (29.9mm) long. Fits all Glock pistols except M36.

- #100-002-412AS Ext. Slide Lock Lever for Glock, 2K8L61 .. \$ 8.99

NEW! **CYLINDER & SLIDE BROWNING HI-POWER
EXTENDED SLIDE RELEASE**

Operate With Shooting Hand Thumb Without Shifting Your Grip

Replacement for the nubby factory slide release enables you to use the thumb of your shooting hand to release the slide without having to shift your grip on the pistol. Ergonomically angled for natural, positive thumb contact, with enlarged thumb pad that's

110° wide to give you a firm purchase even under stress. Gunsmith installation recommended.

SPECS: Carbon steel, blued or hard chromed. Fits Hi Powers chambered in 9mm and .40 S&W.

- #206-000-066AS Hi-Power Slide Stop, Blued, 6K40Q48..... \$ 44.99
- #206-000-067AS Hi-Power Slide Stop, Chromed, 6K60M29..... 66.99

EXTENDED SLIDE RELEASE LEVER for GLOCK®

Easy To Hit For Positive Slide Release On The First Try

Drop-in replacement for factory slide release lever has a much larger finger pad and a trapezoid-shaped bump that help ensure you release the slide fast, on the first try, after a reload. Saves precious seconds that can be lost making multiple swipes to release the slide and chamber the next round. Low profile and smooth contours will not affect holster fit or snag on clothing. Rugged, all-steel construction; matte black finish matches Glock factory finish. Separate models to fit current-production 3-Pin and early 2-Pin pistols, plus G37/38/39 pistols chambered in .45 GAP.

SPECS: Steel, matte black finish. 3-Pin fits all guns with separate trigger, locking block, and trigger housing pins, including early 2-Pin G19. Does not fit early G17, 17L, and 34 2-Pin guns. 2-Pin fits G17, 17L, and 34 that do not have a locking block pin, manufactured from 1986 to mid-2002. 37/38/39 fits all G37, 38, and 39 pistols.

- #100-002-748AS 3-Pin Ext. Slide Stop Lever, 3-Pin, 1D9H79 \$ 9.99
- #100-002-747AS 2-Pin Ext. Slide Stop Lever, 2-Pin, 1D9G77 9.99
- #100-002-698AS 37/38/39 Ext. Slide Stop Lever, 1D9N82 9.99

ARO-TEK™

EXTENDED SLIDE RELEASE for GLOCK®

Increases Leverage For Easier Operation

Extends rearward for increased leverage and easier, faster chambering after magazine changes. Rounded shape extends slightly away from the slide so it's easier to engage but won't catch on clothing or holster during a draw.

SPECS: Steel, blue or silver finish, includes spring. 1001 fits 17/17L single pin models. 1003/1004 fit all 2-pin models except Model 36. 36B fits Model 36 only.

**SMART LOCK TECHNOLOGY SPRINGFIELD XD
MAGLOC® EXTENDED SLIDE RELEASE**

Large, Easy-To-Locate Contact Pad For Fast, Positive Slide Release

Replacement slide release lever has more than twice the contact surface of the XD9/40's tiny factory part to make hitting the release or manually locking back the slide easy, painless, and fast. Helps you reload faster—simply hit the Magloc button with the thumb of the shooting hand to close the slide on a fresh mag, rather than manually racking with the off hand. The larger button surface spreads the pressure you apply over a larger area of the thumb, so it feels like you're using less pressure to operate it. Machined, hardened steel construction, with three large horizontal grooves to give secure, non-slip purchase; low profile won't interfere with any holster designed for the stock XD.

SPECS: Steel, blued, matte finish. Contact Pad - 1 1/8" (2.8cm) long x 3/16" (7.9mm) high. Fits Springfield XD standard and compact models in 9mm or .40 S&W only. Does not fit pistols with thumb safety or any of the XDM series.

- #100-005-900AS Extended Slide Release, 2A39D51... \$ 42.99

NEW! **VICKERS TACTICAL
TACTICAL SLIDE STOP for GLOCK®**

Optimum Shape To Ensure Positive Thumb Contact

Redesigned thumb pad places the pad slightly forward to help prevent accidental slide stop engagement, even when you're wearing gloves. Stamped and formed from durable 4130 steel, then treated with a special hardcoat finish that resists rust and wear.

SPECS: 4130 chrome-moly steel, black, matte finish/ includes spring. Gunsmith installation recommended. VTSS-001 fits Glock 17, 17L, 18, 19, 21, 22, 23, 24, 25, 26, 27, 28, 31 thru 35, and 41. VTSS-002 fits Glock 42 and 43 only.

- #100-017-672AS VTSS-002 Slide Stop, 9B17G79..... 18.95

LONE WOLF 3-PIN EXTENDED SLIDE STOP for GLOCK®

Aids In Smooth Reloads & Fast Return-To-Battery

Drop-in replacement for factory part has a larger, easier-to-locate thumb pad that helps you release the slide and return to battery faster after an empty-gun mag change. Fits all "3-pin" (trigger pin, locking block pin, and trigger housing pin) Glocks, except G36.

SPECS: Steel, electro-coated, matte black finish. Fits all 3-pin Glock pistols, except G36; will not fit early 2-pin 17, 17L and 34.

- #100-006-699AS 3-Pin Extended Slide Stop, 2K10G03. \$ 11.49

**TANDEMKROSS RUGER MARK III & 22/45
MAGAZINE DISCONNECT BUSHING**

Eases Takedown, Lets MKIII Pistols Fire Without Magazine Inserted

Stainless steel bushing replaces factory bushing on MKIII and 22/45 Ruger pistols to enable pistol to fire with magazine removed. Also eases takedown and lets magazine fall from the gun. High-quality steel construction resists heat, corrosion and rust. Will not effect trigger function or feel. Fits MKIII and 22/45 only.

- #100-014-444AS Magazine Disconnect Bushing, 1G9L36..... \$ 9.99

**VOLQUARTSEN RUGER® MARK III™
SPRING LOADED MAGAZINE EJECTOR**

For Fast, Positive Magazine Ejection

Drop-in, no-gunsmithing kit helps provide fast, positive magazine ejections—even with partially loaded magazines—each and every time. Fits inside the magazine well, completely out of view, and applies spring pressure to ensure the magazine pops out smoothly when released. Machined from 6063 aluminum alloy for a precise fit, then hardcoat anodized for added strength and durability.

SPECS: 6063 aluminum, hardcoat anodized, matte gray finish. Steel spring. Fits Ruger Mark III pistol only.

- #930-000-054AS Spring-Loaded Mag Ejector, 3Z22I75 .. \$ 29.75

**BERETTA MODEL 92
FACTORY HIGH CAPACITY
MAGAZINES**

Dependable, Factory Magazines For Superior Performance

Factory, double stack 9mm magazines are ultra-reliable in combat or competition. High-tech manufacturing techniques allow seamless construction for snag-free follower movement and smooth insertion into the mag well. Self-lubricating follower is injection molded from high-strength polymer for durability. Numbered witness holes on the backside allow easy viewing of remaining ammunition. Built from high carbon, heat-treated steel for maximum strength; includes a high tensile strength music wire spring that resists memory and won't weaken over time. Removable base pad allows easy cleaning. **Sand-Resistant 15-Rd (SR)** model features a synthetic base pad, a full-length "sand slot" to allow debris to fall out, and a special dark gray, high-lubricity coating for improved reliability in desert environments. Adopted for use by the USMC. **17-Rd, 20-Rd, and 30-Rd** magazines come with a synthetic base pad and an attractive, high-gloss blued finish. **20-/30-Rd** feature a polymer shroud that protects the lower half of the magazine and acts like a grip extension for added control. **CX4 Magazine Conversion Kit** lets you use any of these magazines in the Beretta CX4 Storm carbine.

SPECS: Body - Carbon steel, heat treated. Spring - Music wire. Follower/ Pad - Polymer, black. Fits all 9mm Beretta 92s, except Type-M and old Model 92/92S that use a single stack magazine. 15-Rd SR - Dark gray, high-lubricity coating, polymer base pad. 17-Rd/30-Rd - Blued, gloss finish, polymer base pad.

**MAGAZINES THAT WON'T HOLD
ADVERTISED NUMBER OF ROUNDS**

New magazines, and/or magazines with new springs, may not let you load them with the maximum number of rounds they should hold. Here's the solution: load them up with the maximum number of rounds you can and let them set for a few days. The new spring will take its normal "set" and allow the rest of the rounds to be loaded.

**BERETTA PX4 STORM
FACTORY MAGAZINES**

Genuine Factory Magazines For Perfect Fit & Performance

Full-capacity OEM magazines are the exact ones that Beretta ships with new Px4 pistols, so you know you have a replacement mag made to fit your gun. None of the compromises you make with cheap aftermarket mags. Heat-treated steel tube, "memory resistant" music wire spring that resists taking a set, self-lubricating polymer follower, and a removable polymer base pad for easy cleaning.

SPECS: High-carbon, heat-treated steel, blued, or natural-finish stainless steel.

NEW! CZ-USA FACTORY PISTOL MAGAZINES

Super-Reliable Mags That Match The Quality Of Your CZ Pistol

Long regarded as one of the most reliable and comfortable-to-shoot pistols of all time, the CZ 75 (and its children) is a favorite of military forces, police agencies, competition shooters, and handgun connoisseurs all over the world.

These magazines tuned to correct CZ factory specs help ensure smooth, reliable operation of your gun. All models listed here have a strong steel mag body, easy-to-remove polymer floorplate, and a smooth-sliding polymer follower. Restricted-capacity 10-round mags are constructed so they cannot be altered to increase capacity. TS = Tactical Sports.

MEC-GAR BERETTA M9/M92 OPTIMUM MAGAZINES

High Capacity With Anti-Friction Coating; The Mags That Really Work

You'll gain reliable, additional round capacity with these high quality replacement magazines that really fit and function like proven factory magazines. Tempered steel body with hardened feed lips is treated with a phosphated anti-friction coating inside and out to ensure drop-free operation and no-jam feeding. Hardened, high tensile music wire spring and supported, self-lubricated nylon follower eliminates follower tilt so every round feeds flawlessly. Flush-fitting, 18-Round magazine features a tough synthetic base pad that removes easily for magazine cleaning. 20-Round model includes a removable, synthetic "Plus 2" base pad. Witness holes in the rear side on both models provide fast, remaining round count.

SPECS: Body - Hardened carbon steel, black phosphated anti-friction coating. Spring - High tensile music wire. Follower - Nylon, black. Fits Beretta M9 and M92, 9mm caliber.

MAJESTIC ARMS RUGER® MARK II/III COMPETITION MAGAZINE & EXTENDED BASE PAD

Reliable-Feeding Competition Mags For Your Ruger .22 Pistol

Durable, blued steel 10-round magazine offers positive feed and ejection for the competition shooter. Magazine comes with attached machined aluminum extended base pad that helps magazine insertion

and removal and allows the shooter to determine magazine orientation by touch. Designed to not get stuck inside the pistol if magazine is accidentally inserted backwards. Ruger Mark II & III Magazine fits both Mark II and III pistols. Ruger Mark II/III & 22/45 Magazine universally fits Ruger 22/45, Mark II and Mark III pistols. Magazines will not fit Ruger Mark I pistols.

SPECS: Magazine - Steel, blued finish. Polymer follower. Base Pad: Machined aluminum, natural finish. 10-round capacity.

HIGH-CAPACITY MAGAZINES

While the Federal Ban on magazines with capacity above 10 rounds has been lifted, some states and cities have their own bans in place. In those areas it is still illegal to use rebuild components to assemble a new, high-capacity magazine. Please be sure to comply with all state and local ordinances when rebuilding magazines.

PRO-MAG FN FIVE-SEVEN 30-ROUND MAGAZINE

Increases Capacity By 10 Rounds Over Factory Magazine

Rugged, lightweight polymer magazine increases the capacity of your 5.7 x 28mm FN Five-seveN pistol by an additional 10 rounds over the factory mag. Extension is contoured for a smooth, seamless fit to the bottom of the mag well, with exterior texturing that matches the pistol grip's texturing.

SPECS: Reinforced, injection-molded polymer, black. 30-round capacity. Fits FN Five-seveN pistol chambered in 5.7 x 28mm. #687-000-038AS 30-Rd Five-seveN Mag, 7H33K19 \$35.99

MAGPUL PMAG GL9 MAGAZINES for GLOCK®

Brings Magpul Reliability & Durability To Your 9mm Glock® Handgun

Constructed of a proprietary polymer, these durable magazines fit double-stack 9mm Glock handguns, including Gen 4 models. Reinforced feed lips, a stainless steel spring and a high visibility anti-tilt follower ensure reliable feeding. Pushbutton release on the floorplate allows the magazine to be easily disassembled without tools. Floorplate also has a pen dot matrix on the bottom for marking and identifying magazines. The GL9 consistently drops clear and free when released; loaded or empty. 17 GL9 fits flush at the base of the Glock 17 grip, with some protrusion on compact and subcompact models. 15 GL9 fits flush on Glock 19, with minor protrusion on subcompact pistols. 21 GL9 meets competition rules for 140mm mag OAL. 27 GL9 meets competition rules for 170mm mags.

VOLQUARTSEN RUGER® 22/45® SPRING-LOADED MAGAZINE EJECTOR

Drop-In Magazine Upgrade Gives Faster, Easier Reloads

Easy-to-install, machined aluminum floorplate helps you perform the fastest possible reloads with your 22/45. The built-in, spring-loaded plunger forcefully ejects the magazine clear of the gun, while the extended base rides well below the mag well to ensure positive insertion every time. Installs in place of the factory base plate; no gunsmithing required.

SPECS: Aluminum, matte black hard anodized finish. 2" (5 cm) length, 1" (2.5 cm) width, 3/4" (1.9 cm) height. Fits Ruger 22/45 magazines only.

- #930-000-138AS Spring-Loaded Spring Ejector, 3Z26I27 \$ 28.99

SATISFACTION GUARANTEED SINCE 1939

SPRINGFIELD ARMORY XD-S™ MAGAZINES

Factory Magazines For
9mm & .45 Compacts

Same as the mags that came with your pistol, these single-stack stainless steel magazines resist wear and corrosion for extra-long service life. Molded polymer follower with integrated steel plate reliably raises the slide lock into position after the last round is fired. Base plate removes for cleaning. 7-round .45 mag and 9-round 9mm model come with polymer sleeves that match both backstraps that came with your pistol. **■**
SPECS: Stainless steel mag body, polished natural finish. Fits single-stack, .45 ACP Springfield XD-S pistols.

SIG SAUER P238/938 FACTORY MAGAZINE

Factory Mag For Reliability & Perfect Fit

Original factory magazines fit perfectly in your Sig Sauer pistol. These are the same magazines shipped from the factory with your gun and are listed in the factory parts section of our Big Catalog. Stainless steel tube is polished to a slick finish that resists attracting dust and dirt, and easily slides in and out of the magwell. Dimpled steel follower helps hold the last round in place; aids in controlled feeding. Full power factory spring feeds round after round reliably. Witness holes on each side instantly let you know how many rounds are in the magazine. **P238** magazine holds 6 rounds. **P938** magazines available in 6- or 7-round capacity. 7-round magazine has a contoured extension that matches the pistol grip and gives added grip surface for improved control and handling. **■**

SPRINGFIELD ARMORY XD/XDM FACTORY HIGH-CAPACITY MAGAZINES

Made The "Factory Way" For
Smooth, Reliable Feeding

Long-lasting, stainless steel, high-capacity magazines are made to precise, factory tolerances to ensure maximum firepower and reliability from your Springfield XD pistol. Steel spring and molded polymer follower feed rounds smoothly and reliably to the chamber, every time. Highly polished body won't drag or hang-up during high-speed, tactical reloads. High-impact, polymer, base pad removes easily for cleaning. Numbered witness holes provide quick round count. Magazines fit 4" Service and 5" Tactical model pistols.

SPECS: Body - Highly polished stainless steel. Base Pad & Follower - Polymer, black. Capacity: 9mm - 10-, 15- and 16-rounds; .40 S&W - 11- and 12-rounds; .45 ACP - 9-, 10- and 13-round capacities available. Fits Springfield XD Service and Tactical model pistols with 4" or 5" barrel. .45 ACP 13-round magazine also fits XDM. .375 - 10 rounds.

TACTICAL SOLUTIONS RUGER® 22/45 S.L.A.M. MAGAZINE

Fixes Issue With Loose Magazine

Easy to grip, spring loaded magazine eliminates the seating and feeding problems commonly associated with Ruger 22/45 factory magazines. Magazine is easily inserted into the pistol and locks securely in place. Spring loaded detent in base makes sure the magazine is fully ejected from the pistol when the release button is pushed. The 10 round magazine is compatible with all generations of the Ruger® 22/45 and 22/45® Light. **SPECS:** Steel body, black. Polymer floor plate, black. 10rd capacity, .22 long rifle.

#100-014-173AS Ruger 22/45 S.L.A.M. Magazine, 8K32D67 \$ 33.99

MAGPUL SPEEDPLATE for GLOCK®

Fast Mag Changes, Easy Retention After Tactical Reloads

Rubber-coated floorplate with finger loop replaces the factory floorplate of your 9mm/.357/.40 Glock pistol magazine to give you the added tactical or competitive edge of faster mag changes. The easy-to-grasp loop aids in quick, positive extraction from tight mag pouches and helps you hang onto a partially expended magazine with just a finger after a tactical reload. Also gives the lower fingers a convenient rest for a more solid grip on subcompact models like the Glock 26/27/33. Made of polymer resin and no-slip Santoprene® rubber to cushion the magazine from impact when dropped on concrete or other hard surfaces. Available in 3-Paks. **SPECS:** Santoprene synthetic rubber over hard polymer, black. Fits Glock 9mm/.357/.40 magazines. 3-pak.

#100-003-077AS Magpul Speedplate for Glock, 3-pak, 3K11Q61 \$ 14.20

TRIPLE K SEMI-AUTO MAGAZINES

High-Quality Replacements For Many Current & Obsolete Pistols

Now you can keep your pistol shooting with these high-quality replacement magazines. 100% Made in the U.S.A. All feature welded seams, machined followers, and music wire springs. Unconditionally guaranteed to fit and feed. **SPECS:** Steel, blue, matte finish unless otherwise denoted in fits line. RDS indicates capacity of magazine.

10-8 PERFORMANCE S&W M&P .45 ACP MAGAZINE BASE PLATE

Durable Aluminum Replacement For The Factory Plastic Part

Lightweight aluminum base plate replaces the factory plastic pad and won't crack, chip or break when dropped on a hard surface. Elliptical cut-outs on the front and sides provide an easy-to-grasp surface for fast reloads and quick clearing of a stuck mag. Streamlined front and rear lips help prevent hang-ups with other mags during removal from a belt pouch. Bottom of the pad features eight dimples to aid in marking individual magazines. **SPECS:** 6061 aluminum, hard anodized, matte black. 9mm/40 - 1 1/4" (4.5cm) long, 1 1/2" (3cm) wide, 3/8" (8mm) high. Fits only new style magazines with square button retainer button. .45 ACP - 1 1/2" (4.5cm) long, 1 1/2" (3cm) wide, 3/8" (8mm) high. Fits magazines for Smith & Wesson M&P .45 ACP pistols with full-size frames.

#100-004-454AS M&P Base Plate, .45 ACP, 1B17F51 \$ 19.99
 #100-011-608AS M&P Base Plate For Square Button Only, 9mm/40S&W, 1B17C96 19.99

LOW-PROFILE .45 MAGAZINE BASE PAD - Machined aluminum base pad for extended 14-round .45 ACP magazine offers a much lower profile than the factory pad. Eliminates the factory pad's extended "toe" that can snag on adjacent mags in a pouch, and is less bulky for better reload indexing. Side scallops give you a better grip during tactical reloads and help you pull a stuck magazine out of the magwell. **SPECS:** Aluminum, hardcoat anodized, matte black. Fits Smith & Wesson M&P 14-round .45 ACP magazines only.

#100-005-980AS Low-Pro. .45 Base Pad, 1B34C18 \$ 36.99

KRUNCH PRODUCTS MAG SLICK

Keeps Magazines Clean & Working

Aerosol, dry lubricant, improves magazine function and feeding. Protects against corrosion, repels dirt. Dries in seconds, safe for all metal and plastic mags. **SPECS:** Aerosol, 6 oz. (170 g) wt.

#474-000-001AS Mag Slick, 4G7C64 \$ 8.99

ARREDONDO EXTENDED BASE PAD for GLOCK®

Provides Extra Capacity For High-Capacity Magazines

Two-piece, synthetic base pad increases the cartridge capacity of pre-ban, Glock magazines without compromising reliability. Impact-resistant pad locks securely to the magazine body; removes quickly and easily with the supplied compression tool. Wolff 10% extra-power spring ensures reliable feeding. Checkered, bottom panel allows positive, non-slip, mag changes. **Plus 5** extends pre-ban magazines to 140mm. Adds +6 rounds to 9mm, +5 to .40 S&W and 10 mm, and +4 to .45 ACP. USPSA Limited legal. **Plus 3** meets the PPSC box rule. Adds +4 rounds to 9mm and +3 rounds to .40 S&W pre-ban mags. **SPECS:** Pad - High-impact, fiberglass-filled nylon, black, blue, or red. 1 1/2" (3.8cm) long, 1 1/8" (2.9cm) wide, 1 1/8" high for 9mm/.40 S&W, 10mm/.45 ACP is larger. Spring - Tempered music wire, 10% extra power.

PEARCE GRIP GRIP ENHANCER for GLOCK®

Provides Extra Gripping Surface

Replaces factory floorplate to fill the opening at the bottom of the Glock® frame to provide a more comfortable and secure gripping surface. Does not increase overall length of grip. **SPECS:** Nylon plastic, matte black. Fits new-style metal lined magazines for Glock models 17, 18, 19, 22, 23, 24, 25.

#092-100-201AS FML Grip Enhancer, 2K7L03 \$ 8.99

NEW! STRIKE INDUSTRIES GLOCK® 42/43 ENHANCED MAGAZINE PLATE

Increases Capacity By +2, Improves Control, Smooths Mag Changes

Enhanced Magazine Plate (EMP) magazine extension adds two (+2) more rounds to your compact Glock's magazine capacity and give you an extended gripping surface. Increases your firepower, while it gives you better control - and so better potential accuracy - when firing the pistol. Extended surface aids in smooth, fast, positive mag changes, too. Made of strong, impact-resistance molded hard polymer, with an aggressively "knobby" texture further enhances your hold on the pistol. Retains factory magazine spring.

#100-017-975AS EMP for Glock 42, 2H10I77 \$ 11.95
 #100-018-240AS EMP for Glock 43, 2H10C56 11.95

FREED DESIGNS SMITH & WESSON M&P XGRIP™ MAGAZINE ADAPTER

Adapts Full-Size Pistol Magazines To Compacts For Increased Firepower

Durable Xgrip magazine adapters easily convert full-size M&P magazines for use in compact models, so you have more ammo available when you need it. Converts 15- and 17-round magazines from full-size M&P pistol chambered in 9mm, .40 S&W, and .357 SIG for use in M&P compact pistols of the same caliber. Gives added support for your little finger to improve comfort and weapon control. Special, impact-resistant, polymer construction takes a beating, yet weighs only ounces. Easy installation: just slide the adapter over the full-size magazine and snap into position around the floorplate. **SPECS:** Polymer, black. 2 1/8" (5.4cm) long, 1 1/8" (2.8cm) wide, 1 1/8" high. Fits factory 15- and 17-round magazines from fullsize Smith & Wesson M&P pistols chambered in 9mm, .40 S&W, and .357 SIG for use in M&P compact pistols.

#100-004-443AS S&W M&P Xgrip Adapter, 2A14B39... \$ 14.99

ARREDONDO SMITH & WESSON M&P EXTENDED MAGAZINE BASE PAD

Increases Mag Capacity; Easy To Install

Replaces factory pad to increase magazine capacity without compromising reliability. A great way to increase firepower without having to buy all-new mags! Checked bottom panel assists in fast, positive, non-slip, mag changes. Retains the factory spring. Two attachment options: For low-stress applications where mag will not be ejected onto hard surfaces, use the spring plate to lock the extender and add **6 rounds**. Use the L-shaped locking insert for extra-secure attachment and add **5 rounds**.

SPECS: Fiberglass-reinforced nylon, black.

#069-000-032AS S&W M&P Ext. Base Pad, 9F15D54... \$17.60

TANGODOWN VICKERS TACTICAL FLOORPLATES

Oversized For Reliable
Mag Extraction Under All
Conditions

The Vickers Tactical floorplate gives the shooter an enhanced gripping surface for ripping a stuck magazine from the gun if it refuses to fall free during a crucial reload. The larger plate works well with gloves and can even be hooked on a belt or holster in a tight situation. Plates are made of glass-filled nylon for high strength and impact resistance and have eight concave dots molded into the bottom for numbering or marking your magazines. **Glock Small Frame** fits magazines for pistols in 9mm, .40 S&W, .357 SIG, and .45 GAP. Sold in a 5-Pak. **G42** fits Glock model 42 only. Sold in 2-Pak. **M&P** fits Smith & Wesson M&P full-size magazines for pistols chambered 9mm, .357 SIG, and .40 S&W; will not fit M&P Compact mags.

SPECS: Nylon, matte black (BLK) or Flat Dark Earth (FDE). 1.560" (3.97cm) long, 1.435" (3.64cm) wide, .250" (6.4mm) thick.

TAYLOR FREELANCE EXTENDED MAG PAD

Increases Capacity, Maintains USPSA
Mag Length Limits

Extended base pads of machined aluminum or Delrin® clamp securely to the magazine with an aluminum retainer plate, eliminating unexpected "speed unloads" when a plastic snap-on extender fails. Designed to keep magazine overall length within the 140mm and 170mm USPSA and IPSC limits. Some models come with an extended magazine spring; others use factory spring. Either way, there's nothing more for you to buy! **Glock** models fit "drop-free" magazines (will not fit original, non-drop magazines).
SPECS: Machined aluminum, hardcoat anodized, or Delrin (Glock only), black. Aluminum clamp, natural silver.

TARAN TACTICAL FIREPOWER BASE PAD

Increases Mag Capacity & Helps Mag Drop Free

Machined aluminum magazine baseplate easily slips onto semi-auto pistol mags to increase capacity. With the Firepower installed, the mag's overall length stays within the USPSA 140mm limit. Increases capacity of a 17-rd 9mm mag to 23 rounds (+6), and a 15-rd .40 S&W mag to 20 rounds (+5). Still allows a fully loaded magazine to easily load into the gun, and the extra weight at the base helps the mag to drop free for easy reloads. Requires no tools to install. Includes replacement magazine spring.

SPECS: Machined aluminum, hardcoat anodized, matte black. Glock - 1 1/2" (3.8cm) tall, 1 3/4" (4.3cm) long, 1" (2.5cm) wide, 1.7 (47g) oz. wt. S&W M&P - 1 1/4" (3cm) tall, 1 1/4" (3cm) long, 1" (2.5cm) wide, 1.3 (37g) oz. wt.

BROWNELLS CHROME SILICON MAGAZINE SPRINGS for GLOCK®

Consistent Delivery Of
Every Round

Chrome silicon springs deliver consistent pressure and reliable feeding of every round in high-capacity magazines. Many springs continue to set and weaken over time, eventually failing to feed all the rounds in the mag and require replacement. Quality springs, like our chrome silicon springs, take an initial set (all springs do) then stabilize for long service life. Models for Glock 17/17L (7 & 19 rds) and Glock 19 (15 & 17 rds).
SPECS: Chrome silicon. 7" (17.7cm) long. Models for Glock 17/17L - 17 & 19 rds, Glock 19 - 15 & 17 rds. Available in 3-paks

BROWNELLS BERETTA 92 CHROME SILICON 9mm MAGAZINE SPRING

Smooth, Reliable
Performance In High-
Capacity Magazines

Chrome silicon spring replaces factory spring and provides positive pressure against the follower to ensure that rounds feed smoothly and consistently, even in the worst conditions. Requires dry lubricants only that won't attract grit and sand which can cause misfeeding. Fits high-capacity magazines for Beretta 92 model pistols.
SPECS: Chrome silicon steel wire. Fits Beretta 92 Model high-capacity magazines.

#078-000-129AS Chrome Silicon Mag Spring, each, 8G6H25... \$ 7.49

BROWNELLS/ISMI S&W M&P HIGH-CAPACITY EXTRA-POWER MAGAZINE SPRING

Applies More Pressure To Follower For
Smooth Feeding From Extended Magazines

Extra-length magazine spring replaces factory-supplied spring for use with aftermarket magazine extenders and extended base pads that increase round capacity. Gives follower up to 10% more power for smooth, reliable feeding of rounds. Made of certified aerospace-spec chrome silicon wire, then heat-treated and stress-relieved to ISO 9000 standards.
SPECS: Chrome silicon steel wire. Fits S&W M&P pistols chambered in 9mm, .40 S&W, and .357 SIG.

SPRINGS

BROWNELLS WOLFF PRO-SPRINGS™ FOR ACTION-TUNING

Brownells Pro-Spring™ Kits are made from the very finest high-tensile spring wire - wire that is formulated and drawn especially for the finest quality springs. The tension is actually built into the wire as it is being drawn - not added afterwards by heat treating. Consequently, Brownells Pro-Springs will continue to function correctly and continually, long after many of the other springs have taken on so much "set" that they have lost their ability to return to the required length and tension you need. It's simply not worth taking a chance when the best quality springs are only a small part of the repair or custom project. Find out for yourself the satisfaction of using a really good gun spring - designed and made expressly for us by Wolff, the Dean of quality gun springs for the professional firearms industry.  **SPECS:** RP = Reduced Power, XP = Extra Power, FSW = Factory Standard Weight.

BHP-501 FOR BROWNING HI-POWER - Contains 1 each FSW 17 lb., variable power recoil spring and 32 lb. hammer spring plus, (1) 28 lb., RP hammer spring and XP firing pin spring.

WOLFF SIG MAINSRING KIT

Reduces Trigger Pull,
Improves Accuracy

Three, reduced power springs for tuning and smoothing felt trigger pull. Fits the newer P-220, P-226 and P-229's that use a short mainspring with a plastic, hammer spring base insert. Contains 1 each of 17, 18, and 19 lb., reduced power, mainsprings. P-220 factory spring is 22 lb. P-226 and P-229 factory spring is 24 lb. 

#969-000-021AS SIG Mnsprg Kit, 9F6D37..... \$9.00

ZEV TECHNOLOGIES COMPETITION SPRINGS for GLOCK®

For A Smoother, Crisper, More Refined Trigger Pull;
Drop-In Installation

Precisely calibrated spring weights deliver consistent force through the entire compression/release cycle to give you a light, refined trigger without sacrificing the reliability of your pistol's Safe Action system. High-stress, aerospace-grade stainless steel spring wire is heat- and cryo-treated for 99.99% consistent energy output, so trigger pull feels the same every time. For maximum improvement over factory pull, use with V2 Race Connector, below. **Trigger Spring** has nearly 30% more power than factory spring, yet actually reduces pull by as much as 1 lb. for improved control. Also produces faster trigger reset for quicker follow-up shots. Reduced power **Safety Spring** reduces friction caused by the firing pin safety, further smoothing the pull. **Striker Spring** is designed for improved consistency and durability over factory spring. Available in standard factory weight for a 3 to 3-1/2 lb. pull or light model that reduces pull by at least 1 lb. to a consistent 2 to 2-1/2 lb., while preserving reliable primer ignition. **Competition Spring Kit** contains the trigger spring, firing pin safety spring, and standard power striker spring.  **SPECS:** Spring stainless steel wire. Fits all Glock pistols.

A NOTE ON SPRING "SET" - "Set" is normal in all springs, and is the "held-compression" all springs take after being put under compression for a length of time. What is critical about "set" is that all springs do not take it equally, or stabilize at a predetermined amount of "set". In measured tests, Brownells Pro-Springs™ took 4 to 10 times less set after equal time under compression than did other springs tested. And once stabilized, took no more set. The other springs continued to take "set" until we stopped testing them. Prove it to yourself . . . measure the springs you want to test; lock them in a vise overnight, and when you take them out, measure how much length has been lost. (Do the test on the same springs a second - or third - time. Consider the effect this "shortening" will have an action job that was based on the spring's original length. Trigger pull, action smoothness and even the safe functioning of the gun can be ruined by an inferior spring.

WOLFF RECOIL SPRINGS

High-Quality Replacements/Upgrades Get Your Pistol Running Smoothly Again

For optimum reliability with hardball and hot handloads. Improves overall function by matching the spring to the specific loads being fired. 

BROWNING HI-POWER RECOIL CALIBRATION PAK - A wide range of recoil springs to match your loads and shooting conditions. Factory recoil spring is 17 lb. Fits 9mm and .40 S&W pistols. (1) 17 lb., (1) 18.5 lb., (1) 20 lb. and (1) 22 lb. recoil springs, plus (3) extra power firing pin springs. 18.5 lb. extra power recoil spring also available separately.

#969-131-370AS Recoil Pak, 9F16H66 \$ 20.99

TACTICAL SPRINGS BERETTA 92/M9 RECOIL SPRING

Consistent Performance For High-Stress, High-Volume Shooting

Factory weight 13-lb. recoil spring helps ensure consistent, dependable operation for tens of thousands of compression cycles. Perfect for the high-volume shooter who needs a finely tuned spring that delivers its rated power as reliably on the 50,000th shot as it did on the first. Made from chromium-silicon steel alloy selected specifically for its hardness, heat resistance, and ability to withstand high stresses—the same alloy used for valve springs on automobile engines. Cryogenically treated to relieve internal stress, and surface impregnated with Sprinco's proprietary Plate+ molybdenum disulfide lubricating coating. 

SPECS: Cryo-treated chrome silicon alloy. Fits full-size Beretta 92/M9.

#943-000-016AS Beretta 92/M9 Recoil Spring, 3D7P12 \$ 8.99

WOLFF TRIGGER GROUP COMPETITION PAK for GLOCK®

Easily Improve & Lighten Trigger Pull Without Permanent Modifications

Contains the correctly calibrated springs you need to lower pull weight and improve trigger pull quality of your Glock pistol without complicated gunsmithing or permanent alterations. Installing this kit will not disable or diminish the effectiveness of the well-proven Glock Safety System. Designed specifically to meet the needs of competitive shooters; this alteration is not recommended for duty pistols. 

SPECS: Steel. Includes one (1) each of the following springs: 4lb. reduced power striker spring, reduced power safety block spring, and extra power trigger spring. Fits all models and calibers of Glock pistols.

#969-000-177AS Trigger Group Competition Pak for Glock, 9F6L37 \$ 9.00

APEX TACTICAL S&W M&P AEK TRIGGER

High Performance Replacement For The Factory Trigger

The AEK machined aluminum trigger is a direct replacement for the factory trigger that reduces take-up and over-travel by 20% in the S&W M&P pistol. The center-mounted, pivoting safety keeps the trigger from moving until it is depressed by the shooter's trigger finger to prevent unintended operation. The flat, target-style trigger face helps shooters position their finger on the centerline and helps them to press the trigger directly to the rear for better control. Works in all centerfire versions with factory parts or with Apex Tactical internals, except the Forward Set Sear and Trigger Kit. Installation video is available on the manufacturer's website. 

SPECS: Aluminum, matte black anodized. Fits all M&P pistols in any centerfire caliber currently available. Not for use with Apex Tactical Forward Set Sear and Trigger Kit.

#100-010-583AS AEK M&P Trigger, 7F74K54 \$ 76.99

**APEX TACTICAL SMITH & WESSON M&P
FLAT-FACED FORWARD SET
TRIGGER**

Gives A Light, Consistent Pull With A 1911-Like Feel

Exclusive - red finish available ONLY from Brownells! Drop-in replacement trigger has less pre-travel and over-travel to give you M&P a total trigger travel distance similar to 1911-type pistols. Smooths takeup and reset, while reducing pull weight to between 4 and 5 lbs. (can be set as low as 3 lbs. with lightweight springs - not recommended for duty/carry use), all giving you better control for consistent shot placement. Trigger face replicates the feel of a flat 1911 trigger, while retaining the M&P's pivoting safety, enabling lower finger placement for more leverage to take advantage of the lower pull weight in competition. Fits S&W M&P centerfire pistols built after June 2011, except Shield. Minor fitting may be required. Trigger must be used with the included replacement sear, striker block and spring, 2 trigger return springs, sear spring, RAM spring, and polymer slave pin. **SPECS:** Aluminum trigger shoe, gloss black or red hardcoat anodized. Fits M&P Shield chambered in 9mm and .40 S&W. Trigger comes with trigger return spring installation slave pin. Kit also includes machined sear, Ultimate Striker Block, striker block spring, carry spring set, sear spring, 4 lb. trigger return spring, installation tool, and instructions.

NEW!

**APEX TACTICAL SMITH & WESSON M&P
FLAT-FACED FORWARD SET
TRIGGER**

Gives A Lighter, More Consistent Pull With A 1911-Like Feel

Drop-in replacement for factory trigger has less pre-travel and over-travel to give you M&P total trigger travel distance similar to most factory 1911-type pistols. Lets you put your finger lower on trigger face for increased leverage so you can take advantage of lower trigger pull weights for competition, such as USPSA Open and Limited Division. Trigger face replicates the feel of a flat 1911 trigger, while retaining the pivoting safety to preserve factory safety values. Smooths uptake and rest, while reducing pull weight to

between 4 and 5 lbs. (can be set as low as 3 lbs. with lightweight springs - not recommended for duty/carry use), all giving you better control for consistent shot placement. Fits all S&W M&P centerfire pistols (mfr'd after June 2011), except Shield. Installation may require minor gunsmithing. Kit includes trigger, sear, striker block and spring, 2 trigger return springs, sear spring, RAM spring, and polymer slave pin. Trigger sold separately, for pistols that already have Apex Forward Set Sear installed. Triggers are available in matte black or with a red anodized finish that lets you stand out from the crowd. **SPECS:** Trigger - aluminum, matte black anodized. Sear - hardened steel. Fits all Smith & Wesson M&P pistols, except Shield. Note: older, early-production guns with 1/8" dia. sear plunger and spring require upgrade to new-style sear housing block with 1/8" dia. sear plunger and spring. Kit includes trigger, sear, striker block & spring, sear spring, RAM spring, trigger slave pin, 2 trigger return springs, installation tool, and instructions.

**APEX TACTICAL S&W M&P SHIELD
ACTION ENHANCEMENT
TRIGGER KITS**

Gives An Already Great Carry Pistol A Superb Trigger

Trigger upgrade replaces the hinged factory trigger with a solid aluminum trigger body that reduces pre-travel and over-travel by approximately 20%. Trigger has a smooth face that encourages the shooter to center his finger on the trigger and pull it directly in line with the bore axis to resist unwanted movement that can reduce accuracy. Includes center-mounted pivoting safety that maintains the factory safety values. Available as trigger only or in a kit with the Duty/Carry Action Enhancement Kit that will deliver a smooth, consistent trigger pull approximately 2 lbs. lighter with a faster, more detectable reset. Mostly drop-in installation, though armorer or gunsmith assistance may be needed to install the included Ultimate Striker Block. Available in Black or Red triggers. **SPECS:** Aluminum trigger shoe, gloss black or red hardcoat anodized. Fits M&P Shield chambered in 9mm and .40 S&W. Trigger comes with trigger return spring installation slave pin. Kit also includes machined sear, Ultimate Striker Block, striker block spring, carry spring set, sear spring, 4 lb. trigger return spring, installation tool, and instructions.

**APEX TACTICAL S&W M&P
FORWARD SET SEAR & TRIGGER KIT**

Drop-In Upgrade Gives Smoother Pull, Faster Follow-Up Shots

Drop-in kit gives you M&P a much smoother, shorter trigger pull with a cleaner break than the factory trigger - similar to that of a classic 1911 pistol. Reduces take up and overtravel, and moves the sear break point farther forward to cut down on the length of the pull. A shorter pull means better accuracy and faster follow-up shots. Comes with two interchangeable trigger return springs, one for a 4 lb. pull, the other for a 5.5 lb. pull, so you can further customize the trigger to your needs. Trigger shoe retains the pivoting safety bar to prevent unintended operation. **SPECS:** Trigger - aluminum, matte black anodized. Sear - hardened steel. Fits all Smith & Wesson M&P pistols, except Shield. Note: older, early-production guns with 1/8" dia. sear plunger and spring require upgrade to new-style sear housing block with 1/8" dia. sear plunger and spring. Kit includes trigger, sear, striker block & spring, sear spring, RAM spring, trigger slave pin, 2 trigger return springs, installation tool, and instructions.

**APEX TACTICAL S&W M&P SHIELD
FLAT-FACED ACTION
ENHANCEMENT TRIGGER**

Smoother Pull With Reduced Trigger Travel

Replacement for the factory trigger helps reduce pre-travel and over-travel by approximately 20%. Flat, smooth trigger face encourages the shooter to place their finger in the center of the trigger, directly in line with the bore axis. Trigger return spring sets the trigger pull weight at approximately 5 lbs. and increases uptake pressure. Center mounted pivoting safety bar maintains factory safety standards and will not disengage unless the shooter places their finger directly on the trigger face. Drop in Trigger Kit contains anodized aluminum trigger, fully machined sear, ultimate striker block/spring, shield spring set, sear spring (1/8"), trigger slave pin, 4 lb. rated trigger return spring and Talon Tactical tool. Trigger Only works with Apex Shield Carry Kit or as a stand-alone with the factory sear and other components. **SPECS:** Trigger - Aluminum, anodized, matte black. Steel springs, sear and pins.

**CLARK CUSTOM RUGER® MARK I/II
STEEL TRIGGER**

Precision Trigger Gives 1st-Class Trigger Job

Chrome Moly steel replacement trigger for the Ruger Mark I/Mark II and 22/45 pistols. Precision drilled and reamed pin holes eliminate trigger sloppiness, making it possible for the pistolsmith to complete a first class trigger job on these guns. Adjustable trigger stop screw. As a big plus, Clark also made this 3/8" wide, serrated trigger longer to fit the shooter's finger better. Since trigger pull is so basic to good accuracy, anytime a Ruger Auto comes in for "tuning up," either as a target pistol or for the serious plinker, replacement of the factory trigger with this excellent custom trigger is an obvious and important place to start the accurizing job. **SPECS:** 1/2" (9.5mm) wide, grooved. 1 1/2" (4.2cm) long. Fits Ruger Mark I, Mark II, and 22/45 pistols. Requires gunsmith installation.

- #181-002-022AS Ruger Auto Trigger, 1H27I32..... \$ 30.00

**LIGHTING STRIKE
ALUMINUM TRIGGER for GLOCK®**

Improves Trigger "Feel", Gives Consistent Letoff

Machined aluminum trigger helps eliminate the mushy feel of the factory plastic part. Closely held tolerances remove trigger slop and free movement for smooth, consistent trigger letoff. Trigger face incorporates a wider trigger safety and contoured edges that are easier on the finger than the factory shoe. Drop-in installation requires no modification to gun. Does not alter factory pull weight. **SPECS:** 2024 aluminum, black, anodized. Small fits all 9mm, .357 Sig and 40 S&W. Large fits 10mm and .45 ACP.

POWDER RIVER PRECISION SPRINGFIELD XD ULTIMATE MATCH TARGET TRIGGER KIT

Gives A Lighter,
Faster, Shorter Pull
Than Standard Factory Trigger

Convenient kit contains all the replacement parts to give an XD a short, crisp 3.5-4 lb. trigger pull with a fast reset and a substantial 1/2" reduction in pull length. Eliminates the long pre-travel, via PRP's striker safety lever, while reduced-power trigger and sear springs lower the pull weight. PRP's replacement sear is shaped to help lighten the pull and, more importantly, deliver a smooth, crisp, distinct break. Lightweight polymer trigger shoe speeds reset, while an integral over-travel stop on the back reduces stress on the trigger bar. Requires minor gunsmith fitting; installation instructions included. This trigger is a Springfield Armory OEM upgrade available on new factory XD and XDM pistols. **US**
SPECS: Fits all XD models EXCEPT the new XD MOD 2 pistols in 9mm and .40 S&W, and the XD 45 thumb safety model.

APEX TACTICAL S&W M&P ACTION ENHANCEMENT COMPONENTS

Drop-In Upgrade Parts Improve Trigger Pull
For Competition Or Carry

Drop-in replacements for factory components enhance reliability and optimize the performance of your M&P for different applications. Parts sold separately or in handy kits. **US**

ACTION ENHANCEMENT KITS - Installing the **Competition Kit** yields a smooth, consistent, trigger pull of slightly less than 3 lbs., with shorter over-travel and faster reset than a factory-stock M&P. Retain the factory sear spring to get a slightly heavier 3 1/2 lb. pull. Designed for IDPA, USPSA, Steel Challenge, 3-gun, and similar types of action shooting competition. Not for duty, carry, or self-defense applications. **Duty/Carry Kit** delivers a smooth, consistent 5 1/2 lb. trigger pull with less over-travel and shorter reset. Improves performance of your pistol while maintaining its safety features for daily carry. Retain the factory sear spring to get a slightly lighter 5 lb. pull. Both kits engineered for a drop-in fit, though gunsmith installation is recommended. **SPECS:** Kits include hard sear, **Ultimate Striker Block** (see below), two sear springs (different sizes), and trigger return spring. **Duty/Carry Kit** also includes competition striker spring and aluminum slave pin for installing trigger return spring.

- #100-006-035AS Competition Kit, 9mm/.40/.357, 7F88P74..... \$ 97.99
#100-006-036AS Competition Kit, .45 ACP, 7F91E79... 97.99
#100-006-039AS Duty/Carry Kit, 9mm/.40/.357, 7F81N59..... 92.99
#100-006-040AS Duty/Carry Kit, .45 ACP, 7F81M59..... 92.99
#100-010-772AS Duty/Carry Kit, Shield 9mm/.40, 7F85E17..... 92.95

ULTIMATE STRIKER BLOCK KIT - Hardened stainless steel striker safety plunger has different geometry and dimensions from the factory part to help deliver an exceptionally smooth takeup before the trigger bar engages the sear cam. Minimizes drag on the trigger bar as it transitions to the rest point, and gives a more clearly detectable reset. Mirror polished surface for minimal drag. Includes a reduced-power plunger spring to maintain safety integrity while reducing drag. Also includes a tool to aid in fast, easy installation. **SPECS:** Heat-treated 17-4 stainless steel, mirror-polished surface. Fits all M&P pistols.

- #100-006-044AS Striker Block Kit, 7F32N57..... \$ 35.99

HARD SEAR - Replacement sear machined from hardened A2 tool steel has a different geometry from factory part that dramatically reduces pull weight. Gives a factory gun an approximately 4 1/2 lb. trigger pull, while improving overtravel, sear reset speed, and trigger "feel." Use as a stand-alone upgrade or in conjunction with an Apex Spring Kit (below) and Ultimate Striker Block.

- SPECS:** Hardened A2 tool steel, natural finish. Separate models for 9mm/.357 SIG/.40 S&W and .45 ACP S&W M&P pistols.
#100-006-041AS Hard Sear, 9mm/.40/.357, 7F36G72... \$ 41.99
#100-006-042AS Hard Sear, .45 ACP, 7F36H93..... 41.99

FAILURE RESISTANT EXTRACTOR - Although no gun part can be absolutely failure "proof," this upgraded extractor helps prevent one of the M&P's few weaknesses: occasional extraction failures. The FRE is designed to ensure consistent, reliable extraction under highly adverse conditions. Engagement surfaces are wire electrical discharge machined (EDM) to precise tolerances for a drop-in fit (usually—individual guns may require minor fitting) and exceptional reliability and function. With the FRE installed, M&P shooters have reported

VOLQUARTSEN RUGER® MARK I/II/III™ TARGET TRIGGER

Drop-In Trigger Job For Ruger .22 Pistols

Precision machined from billet for precise fit to cut down trigger weight and eliminate the heavy pressure required to move the factory part. Helps produce a more consistent pull for improved accuracy. Stop screw is adjustable for overtravel and pretravel with the gun fully assembled, so you get a no-creep pull. Ultra-smooth shoe offers more contact with the trigger finger. Available in **Black** anodized aluminum or polished stainless steel (**SS**). Includes trigger spring and trigger spring plunger. **SPECS:** Aluminum, anodized, black, or stainless steel, natural silver finish. .354" (9mm) wide trigger shoe face. Fits Ruger Mark I, Mark II, Mark III™, and 22/45™ pistols.

- #930-012-002AS Ruger Target Trigger, Black, 3Z30K02..... \$ 32.99
#930-000-123AS Ruger Target Trigger, SS, 3Z35I87... 37.99

VOLQUARTSEN RUGER® MARK III™ DROP-IN ACCURIZING KIT

For Smoother Functioning
Pistol With Target-Grade
Accuracy

Easy-to-install kit replaces factory trigger and hammer parts for a smooth, crisp, 2 1/4 lb. trigger pull and faster bolt cycling. Machined aluminum target trigger, with smooth, radiused, .36"-wide trigger face, adjust for take-up and overtravel with included Allen wrench. Trigger is matte black, hardcoat anodized for superior strength and wear resistance. Redesigned stainless steel target hammer and micro-polished sear are surface ground to exact tolerances for a short, fast trigger pull. Engagement surfaces are precision-ground and polished—no stoning required. Polished trigger plunger and trigger rebound spring are matched to the redesigned parts to further reduce trigger pull and provide smoother cycling. An extended bolt release completes the package. **SPECS:** Includes trigger, trigger plunger, trigger rebound spring, hammer, sear, sear spring, bolt release, Allen wrench, and complete instructions. Fits Ruger Mark III and Mark III 22/45 pistols only. May require minor fitting.

- #930-000-046AS Ruger Mark III Accurizing Kit, 3Z105Q27..... \$ 109.99

as many as 2,500 rounds through their pistols without a single extraction failure. **SPECS:** Fits all Smith & Wesson M&P pistols. .45 ACP pistols may require minor fitting.

- #100-006-043AS Failure Resistant Ext., 7F39E99..... \$ 45.99

M&P SPRING KITS - Same springs found in the Action Enhancement Kits can be used as high-quality replacements for worn or tired factory springs. **Duty/Carry Spring Kit** includes a trigger return spring, a slave pin to aid in installing the return spring, and two sear springs. Select the sear spring that works best in your pistol. **Competition Spring Kit** adds a competition striker spring and gives a 3 lb. trigger pull when used with the Hard Sear and Ultimate Striker Kit. **SPECS:** Fits all M&P pistols, recent and older manufacture. Will not fit pistols adapted for sale in Massachusetts.

- #100-006-037AS Competition Spring Kit, 7F21E99.... \$ 25.99
#100-006-038AS Duty/Carry Spring Kit, 7F18K62..... 20.99

NEW! ZEV TECHNOLOGIES FULCRUM TRIGGER SYSTEM for GLOCK®

Precise Letoff, Fast Reset,
Fully-Adjustable For Takeup &
Overtravel; Easy To Install

Convenient kits combine easy drop-in installation with the performance benefits of a custom trigger job to give your Glock an ultra-smooth pull, clean letoff, and short reset without impairing the reliability of the factory safeties. Fully adjustable for pre-travel and over-travel via two easy-to-access hex-head screws (wrench included), so you can tune trigger feel to your exact requirements for maximum control. Trigger shoe and trigger safety are precision machined from 6061 T6 aluminum billet for precise engagement, smooth movement, and superb responsiveness. Engagement surfaces on the stainless steel trigger bar are mirror polished for outstanding sensitivity and consistency. Basic Fulcrum trigger includes preassembled trigger shoe, safety lever, and trigger bar. **Small Frame** model fits 9mm/.357 SIG/.40 S&W pistols and **Large Frame** trigger fits .45 ACP/10mm pistols. **Drop-In Kit** contains the trigger, trigger bar, trigger block, ejector, connector, trigger spring, and a lightweight Titanium firing pin safety plunger and spring to further refine the trigger pull. Comes with a reduced-power striker spring to produce a lighter-feeling trigger for competition, and the factory-weight striker spring for daily carry and duty use. **Ultimate Kit** adds to the Drop-In kit, a skeletonized stainless steel striker with reduced mass and highly polished surface to speed lock time and deliver an even lighter, smoother perceived trigger pull, plus ultra-fast reset so you're ready for follow-up shots. **Gen4 Kits** available for Gen 4 models 17/19 (9mm) and 22/23 (.40 S&W) pistols. **Safety** - some models available with a bright red safety lever. **SPECS:** Aluminum, anodized, matte black; stainless steel, polished finish; molded polymer, black. **Small Frame Trigger** fits 9mm/.357 SIG/.40 S&W Glock pistols, including model 17, 19, 22, 23, 24, 26, 27, 34, and 35. **Large Frame Trigger** fits .45 ACP/10mm Glocks, including 20, 21, 21SF, and 30.

TRIGGERS & COMPONENTS

NEW!

**POWDER RIVER PRECISION
SPRINGFIELD XDS
TRIGGER UPGRADE KIT**

Reduces Trigger Pull & Improves Grip Safety

Upgrade kit includes lightweight sear and all the springs necessary to reduce the trigger pull on your XDS to approximately 4.5-5 lbs. Kit even improves grip safety function by increasing its engagement surface on the sear. Designed for XDS pistols manufactured post recall or that have had the recall work performed on them. **SPECS:** Sear - 440C stainless steel, heat treated to Rc 53-56. Springs - Steel. **#100-018-063AS XDS Trigger Kit, 5C64N9S \$ 64.95**

**VOLQUARTSEN RUGER® MARK II
DROP-IN ACCURIZER KIT**

Instant Target Grade Accuracy

Complete kit eliminates the factory weak spots for a smoother trigger pull and faster bolt cycling. Redesigned, hand matched, hammer and hard-plated sear with fully ground and polished engaging surfaces combine for a shorter, faster trigger pull. Correct angles; no stoning required. Smooth trigger with 1/2" wide face and built-in overtravel screw lightens perceived pull. Trigger rebound spring matched to the redesigned parts to further reduce trigger pull and give smooth cycling. Available with a Black anodized aluminum or natural finish Stainless steel trigger to match the finish of your pistol. **SPECS:** Trigger - 6061 T6 aluminum, hardcoat anodized, black, or stainless steel, natural finish. Stainless steel hammer, sear, and slide stop. Steel springs. Includes complete instructions. Fits Ruger Mark II and Mark II 22/45 pistols only. May require minor fitting.

- #930-012-100AS Ruger Accurizer Kit, Black Trigger, 3Z104D03 \$ 109.99**
- #930-000-124AS Ruger Accurizer Kit, Stainless Trigger, 3Z106Q11 109.99**

VOLQUARTSEN RUGER MK II TARGET HAMMER - Hardened, precision-ground, drop-in hammer lightens trigger pull by 35% on Mark II pistols. Electro-polished to remove even minor imperfections for an ultra smooth sear surface and a clean breaking, target-quality, trigger pull. Includes strut and pin. **SPECS:** Machined steel, 1.05" (2.6cm) long, .56" (14mm) wide, .5 oz. (14 g) wt. Fits Ruger Mark II and Mark II 22/45 pistols only. **#930-012-003AS Target Hammer, 3Z41D67 \$ 44.99**

NEW!

**APEX TACTICAL
ULTIMATE SAFETY PLUNGER
for GLOCK®**

Gives Smoother, More Consistent Trigger Pull

Drop-in replacement for factory safety plunger gives a smoother, more precise trigger pull without compromising reliability. Operates in the same manner as the original, blocking the striker channel to prevent the firing pin from moving forward unless the trigger is manually pulled to the rear. Maintains timing with aftermarket trigger systems. Hardened stainless steel, for extended service life, too. **SPECS:** Machined 440C stainless steel, hardened to Rc 48-54. Fits Glock 17, 19, 22, 23, 26, 27, 31, 32, 33, 34, 35. **#100-014-903AS Ultimate Safety Plunger, 7F16I29 \$ 17.99**

**WILSON COMBAT BERETTA 92/96
SHORT REACH STEEL TRIGGER**

Reduces Trigger Reach

Machined from 4140 heat treated steel, this replacement trigger decreases the trigger reach on Beretta 92/96s. Drop-in trigger is slightly slimmer than the factory originals for improved ergonomics. Trigger also fits: 92 and 96 A1, 90-TWO, 92/96 Centurions, Compact L's, and Compact Type M's. **SPECS:** 4140 steel, Black Armor-Tuff® finish, black. **#965-000-193AS Beretta 92/96 Short Reach Steel Trigger, 5F26F53 \$ 28.99**

NEW!

**GHOST EDGE & PRO TRIGGER
CONNECTORS for GLOCK® 42/43**

Smooths, Lightens & Improves Trigger Feel

Just because you carry a compact pistol doesn't mean you have to accept a stiff, rough trigger pull. These replacements for your Glock 42/43's factory trigger connector improve the entire trigger pull by shortening the overall pull, eliminating over-travel, and providing a faster reset. Reduces pull weight by approximately 3 lbs., giving a smoother, lighter pull. Also removes the notorious "Glock bump" caused by the trigger bar hitting the connector, which makes the shooter apply extra force to get over the bump, typically moving the pistol off target. **Edge** is a drop-in replacement for factory part. **Pro** requires minor fitting (instructions included) to get the cleanest, smoothest release possible. **SPECS:** Stainless steel, polished finish. Fits all models.

- #100-017-381AS G42/43 Edge Trigger Connector, 7K18A19 \$ 24.95**
- #100-017-680AS G42/43 Pro Trigger Connector, 7K31N52 34.95**

**ZEV TECHNOLOGIES GLOCK® GEN4
TITANIUM PIN SET**

Lightweight, Hard Titanium Replacements For Factory Pins

Replacements for factory pins in lightweight, wear-resistant Titanium will outlast your gun's frame. Machined to precise dimensions for snug fit so they resist creeping out of the frame. Kit includes trigger pin, locking block pin, standard-length ejector housing pin, and extended ejector pin. **SPECS:** Titanium, natural silver finish. Fits all Glock® Gen4 pistols, EXCEPT Models 36, 42 and 43. **#100-006-596AS Gen 4 Titanium Pin Set, 8B27E66 \$ 27.99**

**CYLINDER & SLIDE BROWNING HI-POWER
MATCH-GRADE TRIGGER LEVER**

Smooths & Lightens Trigger Pull

Wire EDM machined from A2 tool steel to precise tolerances to provide a more consistent trigger pull that's 1 1/2"-2 lbs. lighter. Heat-treated to Rc 40 for longer service life than cast factory part. **#206-000-053AS Match Trigger Lever, 6K39Q15 \$ 42.99**

NEW!

**GHOST TRIGGER
CONNECTORS for GLOCK®**

Lightens & Improves Trigger Feel

Drop-in stainless steel connector reduces the length of trigger pull, improves reset, and eliminates accuracy-robbing overtravel. **Ghost 3.5** lowers pull weight to 3.5 lbs. for competition and sporting use. **Tactical 5.0** and **Rocket 3.5** reduce trigger-pull weight to 5 lbs. and 3.5 lbs. respectively; both have an extra tab that contacts the trigger bar and prevents overtravel after the striker falls. Both may require minor fitting. **SPECS:** Stainless steel, polished finish. Fits all models.

- #100-000-936AS Ghost 3.5 Trigger Connector, 7K11B08 \$ 12.99**
- #100-000-631AS 3.5 Rocket Connector, 7K21G00 22.99**
- #100-000-935AS 5.0 Tactical Trigger Connector, 7K17D85 19.99**

3.5 ULTIMATE & 4.5 RANGER - Stainless steel connectors reduce trigger pull weight to 3.5 lbs. and 4.5 lbs. respectively. Debris channel "hole" is self-cleaning and reduces friction of trigger parts for smooth, reliable pulls. **SPECS:** Gunsmith installation recommended for 4.5 Ranger trigger. **#100-002-007AS 3.5 Ultimate Connector, 7K16K10 \$ 19.99**
#100-002-008AS 4.5 Ranger Connector, 7K17B39 19.99

EDGE 3.5 - Delivers the light, smooth pull and self-cleaning capabilities of the Ultimate and Ranger, plus the additional benefit of eliminating the bump or "hitch" that is the first resistance you feel as you squeeze the trigger and the trigger bar "bumps" into the connector. Some shooters dislike the hitch; with the Edge 3.5 connector, they don't have to worry about it any more. **SPECS:** Stainless steel, polished finish. Fits all Gen 1 thru 4 pistols, except 42/43. **#100-017-395AS Edge 3.5 Trigger Connector, 7K18E19 \$ 20.99**

MINUS 3.5 CONNECTOR - Provides the 3.5 lb. trigger pull of the factory "T" connector, but its highly polished stainless steel surface makes the pull smoother, lighter, and more consistent. Less resistance counteracts the urge to jerk the trigger and compromise accuracy. Resets faster, too, for faster follow up shots. Requires no permanent alterations to pistol, so the factory connector can be reinstalled. Fits all Glock pistols, except the 42 and 43. **#100-018-171AS Minus 3.5 Trigger Connector, 7K7M21 \$ 8.95**

ARMORER'S SLIDE COVER PLATE - A "must have" for easy, error-free installation of Ghost Rocket 3.5 and Ghost Tactical 5.0 trigger connectors. Plate is sectioned by one-third to permit viewing the sear and firing pin engagement during connector installation. **SPECS:** Clear polymer with grooved face. **#100-001-260AS Armorer's Slide Cover Plate, 7K3C91 \$ 4.99**
#100-018-069AS Armorer's Installation Plate, Glock 42/43, 7K2Q63 2.99

Retains factory safety features. Fits Mk III series; can be altered to fit earlier models. **SPECS:** A2 tool steel, heat treated, blued. Installation requires drilling of slide with included drill bit. Gunsmith installation required. **#206-000-053AS Match Trigger Lever, 6K39Q15 \$ 42.99**

GHOST

ROCKET 3.5 TRIGGER KIT for GLOCK®

Provides Short Pre-travel & Fast Reset

Drop-in kit with newly designed self-cleaning trigger connector helps eliminate bothersome pre-travel and allows fast reset for improved accuracy and quick shot recovery. Trigger connector features a self-cleaning debris channel that reduces accumulation of grit and residue for less friction, longer service life, and improved reliability; connector may require minor fitting. Installation requires no permanent alteration to pistol. Not for use for self defense with 4 lb. firing pin spring or 2 lb. firing pin safety spring. For self defense use with 10mm/.45 caliber Glock, a Wolff 6 lb. firing pin spring and factory Glock firing pin safety spring are recommended. **SPECS:** Trigger Connector - Stainless steel, polished finish. Springs - Tempered steel. Includes 2 lb. firing pin safety spring, 4 lb. firing pin spring, 6 lb. trigger spring, armorer's orange slide cover plate, and armorer's tool. Fits all Glock models.

- #100-003-306AS Rocket 3.5 Trigger Kit for Glock, 7K36177 \$ 39.99**

**BROWNELLS
TRIGGER STOP SCREWS**

Non-Marring Rubber Tips

Controls trigger overtravel for clean let-off. Rubber tips cushion frame "touch" and won't mark trigger loop. Use on handguns, rifles, shotguns. **SPECS:** 8-32 tpi. 6 Pak contains 6 screws and instructions. **#084-010-006AS Trigger Stop Screws, 6-pak, 4H17F56 \$ 22.99**

**GHOST RUGER® SR9®/SR9CTM®/SR40TM
TRIGGER CONNECTOR**

Improves Accuracy By Reducing Trigger Pull & Over-Travel

Redesigned connector reduces the factory trigger pull down to 3 1/2 to 5 lbs., while it drastically shortens or completely eliminates accuracy-robbing over-travel. A debris channel lets dust, dirt, grit, and other foreign matter exit the trigger system, helping to ensure reliable function. Three models available to meet a variety of needs, including concealed carry, competition, and law enforcement use. **Ultimate** model offers drop-in, no-gunsmithing installation for a 3 1/2" lb. trigger pull; comes pre-set for minimum over-travel. The **Rocket** also features a 3 1/2" pull, with a Trigger Control Tab that lets you completely eliminate over-travel for maximum accuracy. Some fitting required. **SPECS:** Steel, polished, natural finish. All models fit Ruger SR9, SR9c, and SR40 pistols.

- #100-005-898AS Ultimate 3.5 Trigger Connector, 7K16C94 \$ 19.99**
- #100-005-896AS Rocket 3.5 Trigger Connector, 7K20B24 22.99**

EMERGENCY & SURVIVAL GEAR

LIGHTING STRIKE TITANIUM SAFETY PLUNGER for GLOCK®

Helps You Get A Smoother, Lighter Trigger Pull

Extremely lightweight titanium safety plunger reduces mass for a lighter felt trigger pull. Titanium nitride coating reduces friction. One of those small detail that helps complete a Glock trigger job. Includes Wolff safety plunger spring.

SPECS: Solid titanium, titanium nitride coated. **Small** - fits all other Glock pistols. 1 oz., (2.8 g) weight. **Large** - fits Model 21 and 30 pistols.

#642-102-021AS Small Safety Plunger, 2D15B14 \$ 17.99

#642-102-017AS Large Safety Plunger, 2D16H66 19.99

LONE WOLF "ULTIMATE" TRIGGER STOP for GLOCK®

Eliminates Over-Travel For
Faster Trigger Reset

Easy-to-install part eliminates trigger over-travel on your 9mm Glock, for faster reset and faster, steadier follow-up shots than with a factory-stock pistol. Helps you keep on the target by reducing the time the sights can "wander" between rapid fire shots. Redesigned polymer trigger housing with steel ejector is a direct replacement for the factory housing and can be installed and removed at will. Recommended for competition use only.

SPECS: Polymer housing, steel stop. Fits G17, 19, 26 and 34; will not fit 30SF.

#100-006-207AS Ultimate Trigger Stop, 9mm, 2K18K54 \$ 21.00

LONE WOLF 3.5 CONNECTOR for GLOCK®

Smooths Trigger Pull, Aids In
Faster Reset

Drop-in replacement connector gives an immediate improvement in trigger performance on any Glock pistol. Provides the same 3.5 lb. trigger pull as the factory connector, but its 25% lighter weight and a highly polished, nickel-plated surface makes the pull smoother and more consistent. Helps the trigger reset more quickly for faster follow up shots and less temptation to jerk the trigger and compromise accuracy. Requires no permanent alterations to pistol, so factory connector can be reinstalled any time. Use in conjunction with Lone Wolf Ultimate Trigger Stop (available separately) for an even cleaner pull.

SPECS: Steel, nickel plated, high-polish finish. Fits all Glock pistol models.

#100-006-204AS 3.5 Connector for Glock, 2K8H65 \$ 13.45

WOLFF BERETTA TRIGGER CONVERSION UNIT

Improves Reliability, Smooths Pull

Drop-in, captured spring unit replaces the factory mousetrap trigger spring to eliminate breakage. Gives a smoother pull and improves trigger control. Robar NP3® coated to reduce friction.

SPECS: Steel, NP3 coated. Fits Beretta, 92/96, 96D and Centurion plus Taurus PT92/96. Does not fit late production guns with polymer triggers. Factory weight or 20% reduced power.

#969-000-060AS Factory Wght Trgr Unit, 9F20F95 \$ 25.99

#969-000-061AS Redc'd Power Trgr Unit, 9F21C76 25.99

LONE WOLF DIST. SIDERLOCK® for GLOCK®

Safety Trigger Helps Prevent
Accidental Discharge

Polymer trigger features a steel cross-bolt safety that locks the trigger to prevent any movement for added protection against accidental discharge. CNC machined cross-bolt slides smoothly in and out with finger pressure for easy, eyes-off operation. On/Off position is easily reversed with included tool and bushing, allowing right- or left-hand operation. In the "Off" position, the original factory safeties are active for added protection. Chrome plating on cross-bolt reduces wear for long service life. Gunsmith installation recommended.

SPECS: Polymer and steel, black. Steel cross-bolt, chrome plated. Replaces factory original trigger. Fits all Glock pistols.

#100-003-545AS SiderLock, 2K49Q95 \$ 49.95

APEX TACTICAL S&W M&P RESET ASSIST MECHANISM

Improves The Trigger Reset On Your M&P

Reset Assist Mechanism (RAM) improves the felt reset on the trigger of your S&W M&P for a crisper and more positive action. Installs into the sear lock of any M&P 9mm, .40, and .357 SIG pistol that does not have a thumb safety, magazine disconnect, or internal locking system.

#100-006-609AS S&W M&P RAM, 7F21J15 \$ 23.99

POWDER RIVER PRECISION SPRINGFIELD XD/XDM STRIKER UPGRADE PARTS

For A Lighter, Cleaner Trigger Pull

XD/XDM STRIKER - Steel striker is heat-hardened to Rc 52-53, with a micro-polished face that helps smooth the trigger pull. Works with the factory trigger components and Powder River Easy-Fit trigger kits. APG approved.

SPECS: Chrome-alloy steel, natural finish. Fits 9mm and .40 S&W Springfield XD and XDM pistols.

#100-005-384AS XD/XDM Striker, 5C36E03 \$ 39.99

STRIKER SAFETY KIT - Titanium striker safety weighs less than factory part and works with the included reduced-power striker safety spring to reduce trigger pull and lock time, while maintaining proper safety function. Compatible with Powder River trigger kits and factory trigger components. APG approved.

SPECS: Titanium, with steel spring.

#100-005-385AS XD/XDM Striker Safety Kit, 5C22F51 \$ 24.99

STRIKER INDICATOR KIT - Low-mass Titanium striker indicator is about 40% lighter than the factory steel part, for faster lock time and a crisper trigger pull in a 9mm/.40 caliber XD/XDM pistol. Included reduced-power striker spring and rebound spring helps ensure consistent primer ignition. Works with factory trigger components and Powder River trigger kit.

SPECS: Titanium, with steel spring. Fits 9mm and .40 S&W Springfield XD and XDM pistols.

#100-005-386AS XD/XDM Striker Indicator Kit, 5C18N00 \$ 19.99

TACTICAL SOLUTIONS RUGER® MARK I/II/III™ & 22/45™ HEAVY DUTY EJECTOR

Hardened, Machined Stainless Steel To Resist Wear & Breakage

Replacement for factory ejector is precision machined from hardened 416 stainless steel billet for extra strength and wear resistance. Ensures positive, consistent ejection, with reduced risk of reliability problems caused by a worn or broken ejector. Includes 416 stainless steel mounting screw.

SPECS: 416 stainless steel, natural finish. Fits Ruger Mark I, Mark II, Mark III, and 22/45 pistols.

#100-005-999AS Ruger .22 Pistol Ejector, 8K17D39 ... \$ 19.99

LIGHTNING STRIKE COVER PLATE for GLOCK®

Durable Replacement To Factory Part Easy,
Drop-On Installation

Cover plate personalizes the look of your Glock and replaces the plastic, factory part for added strength. Installs and removes more easily than the factory cover plate for maintenance access.

SPECS: Machined aluminum, hardcoat anodized, matte black finish. Universal fit for Glock pistols.

#642-000-016AS Cover Plate for Glock, 2D12A12 \$ 14.50

TACTICAL SUPPLY DEPOT SLIDE PLATE for GLOCK®

Functional, All-Metal
Construction; Personalizes
Your Glock

Durable, machined aluminum slide plate replaces factory plastic part and is laser etched with a distinctive decorative logo that dresses up your favorite Glock pistol with your own personal statement. Drop-in fit, so no modifications to the slide are required. Logos will not fade or wear off. Available with American Flag, Punisher, Jolly Roger, Biohazard, Smiley Face, or We The People logo.

SPECS: Machined aluminum, anodized, matte black finish with white logo. Fits all Glock pistol models.

#100-004-914AS US Flag Slide Plate, 4C19L81 \$ 24.99

#100-005-824AS Jolly Roger Slide Plate, 4C19I94 24.99

SPRINGER PRECISION SPRINGFIELD XD/XDM TRIGGER/SPRING KITS

For A Smooth, Crisp Trigger Pull

CNC machined components allow a smooth, crisp trigger with a much lighter pull and more precise letoff for better accuracy and fast follow-up shots. Cuts sear pre-travel by about 1/4" to help increase control and prevent accuracy degrading creep. Kits include the reduced-travel sear with pre-polished face, heat-treated to Rc 45-50, plus trigger and sear springs, trigger bar, 10% reduced power striker spring and 15% extra power striker spring. Lightens trigger pull by approximately 1 to 1 1/2 lbs.

SPECS: Steel, in-the-white. Includes: Sear, heat treated to Rc 45-50, trigger/sear springs, and trigger bar. Striker Springs - Steel, tempered, (1) 10% reduced power, (1) 15% extra power.

PACHMAYR TACTICAL GRIP GLOVE

Absorbs Recoil, Prevents Slippage

Recoil-absorbing, soft rubber sleeve offers a contoured, non-slip grip that dramatically improves shooting comfort and accuracy from your semi-auto duty pistol. Finger grooves and a slight palm swell help reduce felt recoil and muzzle jump for fast, accurate follow-up shots. Vertical and horizontal serrations provide a textured surface that's comfortable and easy-to-hold, especially during long periods in the ready position. Slides over pistol grip.

SPECS: Rubber, textured finish, black. Approximately 2 1/4" (5.7cm) long, 1" (2.5cm) wide, 3/4" (6cm) high. 7 oz. (20g) weight. Glock fits 17, 20, 21, 22, 31, 34, 35, 37. Glock Compact fits 19, 23, 25, 32, and 38. M&P fits Smith & Wesson M&P, all models, all calibers. XD/XDM fits full-size Springfield Armory XD and XDM, all calibers. Ruger LCP/Kel-Tec fits Ruger LCP, Taurus 738 TCP, and Kel-Tec P-3AT/P-32 pistols.

SMART LOCK TECHNOLOGY

MAGLOC® THUMB REST for GLOCK®

Improves Control & Reduces Muzzle Jump For Better Accuracy

Glock Competition 2-M

Glock Duty-M

Ambidextrous rest provides comfortable support for the thumb of your shooting hand. Helps you control muzzle flip for fast, accurate follow-up shots, while the extended beavertail protects the web of the hand from painful contact with the slide. Stainless steel pin replaces the factory trigger housing pin to anchor the rest securely to the grip frame. May require some fitting, but no permanent modification to gun. **Competition 2-M** features 3/16" wide thumb rests for maximum support and muzzle control in action shooting events. **Duty-M** has slightly narrower, 3/16" wide rests for improved fit in duty holsters. **Both rests may limit access to slide lock lever with thumb of shooting hand, and are not recommended for use with thumb-break holsters.**
SPECS: Molded polymer, black. Fits Glock 17, 18, 19, 20, 21, 21SF, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 37, 38, 39. Does not fit slim line Glock 36 or 21SF. Some models, such as 10mm and .45 ACP made after 2007 with serial number starting with L, require enlarged holes on the rest to ensure proper fit. **Competition 2-M** — 1 1/2" (3.8cm) long, 2" (5.1cm) wide, .35" (8.9mm) beavertail. .39 oz. (11g) weight. **Duty-M** — 1 1/2" (3.8cm) long, 2" (5.1cm) wide, .75" (19.1mm) beavertail. .35 oz. (9.9g).

VOLQUARTSEN RUGER® MARK I/II/III VOLTHANE PISTOL GRIPS

Hand-Filling Target Grips For Ruger Mark II & Mark III

Large, contoured, bottom-swell heelrest and wide, upswept thumb-rest straighten and extend the wrist for a relaxed, steadier hold and more reliable accuracy. Wedge-shaped grip area (wide in the rear, narrow in front) and evenly spaced finger grooves match the natural shape of the hand. Flexible, synthetic rubber construction with impressed checkering ensures secure, no-slip one- or two-hand hold. **SPECS:** Thermo-molded Volthane rubber, black. Approx. 3 1/4" (8.2cm) wide at base, 4 1/4" (10.7cm) high, 5.2 oz. (147 g). Right-hand only. Includes Allen head screws and wrench. **Mark II** - One-piece design fits Ruger Mark II and Mark I with "A-100" marked frame. **Mark III** - Two-piece design fits Ruger Mark III only. Does not have silver medallion as shown in photo.
