

# SWAROVSKI RIFLESCOPES

World-Class Optics Deliver Razor Sharp Images & Tremendous Reliability

Known worldwide for their crystal-clear, edge-to-edge clarity, these precision optics are assembled using top-quality components to ensure the utmost in accuracy and reliability. The main tube's microstructure grooves work alongside premium glass and proprietary anti-reflective coatings to prevent residual reflection and maximize light transmission to deliver ultra-vivid, high-contrast images. Swarovski's exclusive, shock-absorbing internal optical system and finger-adjustable turrets are specially engineered to provide you with the most range of adjustment, while maintaining absolute zero - without fail. All models are backed by Swarovski's lifetime warranty. BRH reticle is a heavier, ballistic reticle that features holdover markings for both windage and elevation. BRT-I illuminated reticle is optimized for AR platform rifles, and features holdovers dots for shots out to 500 yards/meters and windage compensation markings for up to 20 mph. CD reticle features an encircled center with a black center-dot for dangerous game or close-quarters applications. 4A-I reticle is a standard crosshair reticle with a red, illuminated center-dot. 7A reticle is a heavier, standard crosshair reticle. Plex reticle is a standard crosshair reticle. BT Plex is the standard Plex reticle that incorporates an easy-to-use ballistic turret that allows you to set 4 predetermined holdover distances, based on your rifle/cartridge, to eliminate the guesswork when sitting long-distance targets.

SPECS: Aluminum, hardcoat anodized, matte black. Z3/Z5 models: 1" O.D. tube. Z6/Z6(i) models: 30mm O.D. tube. Abbreviations/symbols in the tables below: \* = EE (extended eye relief model), E/W = elevation/windage in inches @100 yards.

Z3 RIFLESCOPES - Feature a slim, ultra-lightweight design and a fixed, 100-meter (109-yard) parallax setting. Five layers of Swarovski® coating provide for an impressive 90% light transmission.

## LEUPOLD MARK AR® MOD 1 RIFLESCOPES

Ultra-Clear Scopes Optimized For .223/5.56 NATO Loads; Includes BDC Dial

Rugged, Mark AR MOD 1 scopes have variable power settings for fast, accurate engagement of close and distant targets. Perfect for AR-15s or traditional bolt-actions because the P5 BDC dial aids in precise aiming with .223/5.56 NATO loads. Leupold's Quantum Optical System™ and proprietary Multicoat 4® lens coatings combine to deliver optimal brightness, contrast, and edge-to-edge clarity in all light conditions. Purged with a unique Argon/Krypton gas blend, these scopes are waterproof and highly resistant to damage from shock. Duplex/ Fine Duplex reticles are standard crosshair-style reticles. Mil-Dot reticle is a standard mil-based reticle. FireDot SPR™ (Special Purpose Reticle) features an illuminated green center-dot with a range estimating circle, plus holdover hash marks out to 850 meters. FireDot TMR™ reticle has a green illuminated center-dot, plus windage and holdover hash marks to assist with longer-distance targeting. Both illuminated models feature 6 brightness-intensity settings for quick target acquisition - day or night.

SPECS: 6061 T6 aluminum tube, matte black finish. 1" (2.5cm) O.D. tube. Illuminated models use a CR-2032 battery, included. AO - Adjustable Objective.

**SUPER BRUSH BORETIPS™**

**Easy-To-Use, Reusable Foam Swabs For Thorough Bore Cleaning**

Foam swabs fit standard any 8-32 cleaning rods and serve as a super-handy all-in-one replacement for jags and patches that helps you get your gun absolutely clean. Spongy foam construction ensures a tight fit inside the bore and really soaks up solvents and oils for effective, uniform application. Foam is permanently bonded to a polymer shank that's unaffected by harsh cleaning chemicals. Tips come with the shanks attached to a polymer "sprue" that helps them from getting lost. Each Bore Tip can be reused up to five times.

**SPECS:** Color-coded polymer shank, foam swab head. 8-32 male-threaded. Approx. 2" (5cm) O.A.L. **NOTE: Due to the tight fit, .45 Bore Tip does not fit .44 caliber barrels.**

**HOPPE'S No. 9 AIR FRESHENER**

**Perfect For The Car, Truck, Den, Rumpus Room - Anywhere**

Once you've caught your first whiff of Hoppe's No. 9 Nitro-Solvent gun cleaner, you will instantly recognize that fresh, bracing, pungent scent. Now you can enjoy this one-of-a-kind aroma in your car, truck, boat, or anyplace you want to have the scent of a freshly-cleaned firearm. Die-cut fiberboard air freshener is shaped just like a Hoppe's No. 9 bottle to show everyone that you're a proud member of the "gun culture." Just slip the elastic lanyard around your vehicle's rearview mirror, or tack it up on the wall or in a closet to enjoy the unique scent of one of the world's best gun cleaners.

**SPECS:** Scented fiberboard, approximately 2" (5.1cm) wide x 4" (10.2cm) tall.

**CARLSON'S SNAP CAPS**

**Dry Fire Without Damaging Your Firearm**

Snap caps are great for dry fire practice because they let you concentrate on keeping the firearm steady during the trigger pull, which helps eliminate flinch when using live ammo. Solid aluminum **Rimfire** snap caps protect the breech face and will last for hundreds of "shots". Centerfire **Pistol** and **Rifle** caps have a solid aluminum body and a spring-loaded brass "primer" that absorbs firing pin impact to prevent damage to the tip of the firing pin. **Shotgun** snap caps feature a wool chamber mop that can be soaked with gun oil or preservative to prevent a rusty chamber during long-term storage; available in your choice of a brass or aluminum base.

**SPECS:** **Rimfire** - Aluminum body, fits .22 LR rifles and pistols. **Pistol/Rifle** - Aluminum body, brass "primer." **Shotgun** - Brass or aluminum base, brass "primer" insert, wool mop, 2 3/4" (7cm) long.

**DURACOAT SHAKE-N-SPRAY™ FINISHING KIT**

**Easy Prep & Spray System For A Durable Matte Black Finish**

Easy-to-use kit contains all the components you will need to achieve a durable solvent-, scratch-, and chip-resistant finish on any firearm. Can be applied over bluing, phosphate finishes, and anodizing; also works on plastic and wood. Completely seals the surface to prevent rust and corrosion. Strip the part with the included Cleaner/Degreaser, scuff with enclosed pad, mix the DuraCoat liquid with the hardener, fill the Pre-Val spray unit, and spray the part. Finish dries overnight and attains a complete cure in 3-4 weeks. Contains enough DuraCoat liquid to fully coat a rifle or shotgun.

**SPECS:** Kit contains 4 oz. (118ml) DuraCoat matte black coating, 10ml DuraCoat Hardner, PreVal sprayer with material jar, 6 oz. Tri-Strip Cleaner/Degreaser, mixing cap, scuff pad, and complete instructions.

#100-006-802AK DuraCoat Shank-N-Spray™ Kit, 9K27Y95 ..... \$ 29.99

**DURACOAT SHAKE-N-SPRAY KIT**

*I have used this on two rifles and parts plus a few AR-15 Mags. Works great! Follow instructions and you won't have a problem. Have already ordered two more sets.*
